Gambling has been a practice central to many cultures throughout history. In Dice, Cards, Wheels, Thomas M. Kavanagh scrutinizes the changing face of the gambler in France over a period of eight centuries, using gambling and its representations in literature as a lens through which to observe French culture. Kavanagh argues that the way people gamble tells us something otherwise unrecognized about the values, conflicts, and cultures that define a period or class. To gamble is to enter a world traced out by the rules and protocols of the game the gambler plays. That world may be an alternative to the established order, but the shape and structure of the game reveal indirectly hidden tensions, fears, and prohibitions. Drawing on literature from the Middle Ages to the present, Kavanagh reconstructs the figure of the gambler and his evolving personae. He examines, among other examples, Bodel's dicing in a twelfth-century tavern for the conversion of the Muslim world; Pascal's post-Reformation redefinition of salvation as the gambler's prize; the aristocratic libertine's celebration of the bluff; and Balzac's, Barbey d'Aureville's, and Bourget's nineteenth-century revisions of the gambler. Dice, Cards, Wheels embraces the tremendous breadth of French history and emerges as a broad-ranging study of the different forms of gambling, from the dice games of the Middle Ages to the digital slot machines of the twenty-first century, and what those games tell us about French culture and history. Excerpt from An Exposure of the Arts and Miseries of Gambling: Designed Especially as a Warning to the Youthful and Inexperienced, Against the Evils of That Odious, and Destructive Vice Many, however, it has long appeared very desirable that some of those who, for years, have been inti. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Early in his rise to enlightenment, man invented a concept that has since been variously viewed as a vice, a crime, a business, a pleasure, a type of magic, a disease, a folly, a weakness, a form of sexual substitution, an expression of the human instinct. He invented gambling. Recent advances in the field, particularly Parrondo's paradox, have triggered a surge of interest in the statistical and mathematical theory behind gambling. This interest was acknowledge in the motion picture, "21," inspired by the true story of the MIT students who mastered the art of card counting to reap millions from the Vegas casinos. Richard Epstein's classic book on gambling and its mathematical analysis covers the full range of games from penny matching to blackjack, from Tic-Tac-Toe to the stock market (including Edward Thorp's warrant-hedging analysis). He even considers whether statistical inference can shed light on the study of paranormal phenomena. Epstein is witty and insightful, a pleasure to dip into and read and rewarding to study. The book is written at a fairly sophisticated mathematical level; this is not "Gambling for Dummies" or "How To Beat The Odds Without Really Trying." A background in upper-level undergraduate mathematics is helpful for understanding this work. o Comprehensive and exciting analysis of all major casino games and variants o Covers a wide range of interesting topics not covered in other books on the subject o Depth and breadth of its material is unique compared to other books of this nature Richard Epstein's website: www.gamblingtheory.net Apply an ancient Eastern art to a distinctly Western game to enhance chances of winning. This book provides an overview of the state of the art in research on and treatment of gambling disorder. As a behavioral addiction, gambling disorder is of increasing relevance to the field of mental health. Research conducted in the last decade has yielded valuable new insights into the characteristics and etiology of gambling disorder, as well as effective treatment strategies. The different chapters of this book present detailed information on the general concept of addiction as applied to gambling, the clinical characteristics, epidemiology and comorbidities of gambling disorder, as well as typical cognitive distortions found in patients with gambling disorder. In addition,

the book includes chapters discussing animal models and the genetic and neurobiological underpinnings of the disorder. Further, it is examining treatment options including pharmacological and psychological intervention methods, as well as innovative new treatment approaches. The book also discusses relevant similarities to and differences with substance-related disorders and other behavioral addictions. Lastly, it examines gambling behavior from a cultural perspective, considers possible prevention strategies and outlines future perspectives in the field. The dynamic discussions which took place at the Colloquium on the Economic Aspects of Gambling Regulation: EU and US Perspectives, hosted by Tilburg University, are reflected in this book. It brings together a wide range of perspectives from the contemporary debate surrounding the regulation of gambling from within the context both of the EU and the USA. Not only does the book encompass both ends of the spectrum of the current discussion; it also brings together the perspectives of academics, lawyers and operators. Debates surrounding the regulation of gambling have been increasing in terms of frequency and ferocity, at the national, European and international levels. Within the Member States of the European Union there has been considerable debate as to the appropriate method of regulating gambling, in particular with a view to securing revenue streams for good causes. Concurrently, infringement proceedings of the European Commission and the case-law of the European Court of Justice have the potential to disrupt chosen regulatory approaches and thus long established revenue flows. This is but one of the economic aspects to the regulation of gambling which to date has not been explored within Europe to the extent seen in the United States. Lessons which European jurisdictions can learn from American experiences in this field, and discussions on the state-of-the-art of gambling economics in Europe today, form the basis of this dynamic book. This collection of essays examines the vogue for games and game playing as expressed in art, architecture, and literature in sixteenth- and seventeenth-century Europe. Moving beyond previous scholarship on game theory, game monographs, and period and regional studies on games, this volume analyzes a range of artistic and literary works produced in England, Scotland, Italy, France, and Germany, which used the game topos to illuminate special themes. In essays dealing with chess, playing cards, dice, gambling, and board and children's games, scholars show how games not only functioned as recreational pastimes, but were also used for demonstrations of wit and skill, courtship rituals, didactic and moralistic instruction, commercial enterprises, and displays of status. Offering new iconographical and literary interpretations, these studies reveal how game play became a metaphor for broader cultural issues related to gender, age, and class differences, social order, politics and religion, and ethical and sexual behavior. A collection of reprinted articles from various sources discussing gambling in the United States through the years. New York City filmmaker Michael Jacobs, out of options after the failure of his third film, becomes caught up in a violent underworld when, lured by the promise of easy money, he agrees to be the public face of a plan by his producer Sebbi Laslo to fix a horse race. Is casino management an art? It is for the best casino managers! And Bill Zender knows the art of casino management. In addition to having worked in, managed, and owned casinos for decades, Zender has also been an enforcement agent for the Nevada Gaming Control Board, as well as spent time as an advantage player, exploiting the vulnerabilities of casinos from the civilian side of the tables. Today, he travels the globe consulting for the international casino industry. In Casino-ology, Zender argues against excessive card-counter and shuffle-tracker countermeasures in favor of hand production to increase profits, and concludes that rhythmic dice rollers aren't the threat they're made out to be. He details the dangers of customer-service breaches; ill-conceived non-negotiable-chip programs; and past-posting, marked-card, and false-shuffle scams. He addresses player tracking systems, 6-5 payouts for blackjacks, the subtleties of marketing to Asian customers, nuances of the derivative pit games, even the science of turning around a distressed casino. By challenging long-cherished conventions, Casino-ology provides contrarian and radical, but proven, solutions to common gaming issues, all in the service of refining the art of casino management. This coffee-table art book is one-of-a-kind. From hundreds of portrayals created over centuries by celebrated artists, such as Cezanne, Picasso, Munch, Leger, de la Tour, Remington, and Neiman, the best 120 were chosen to appear in this provocative visual documentation of the evolution of gambling. Much more than a compilation of subject-specific art, this book offers a scholarly look at the history of gaming. Each image is accompanied by a facing page of text, providing readers with a thumbnail sketch of the artist, then zeroing in on the image itself. The renderings, as seen through the artist's eye and preserved on canvas or in stone, serve as a form of "photographic" chronicling that weaves a history of gambling through the ages -- for the benefit of art lovers and gambling enthusiasts alike. Master the Art and Science of the Most Complicated Gambling Game in the World: Texas Hold'em. The dean of Las Vegas bookmakers takes readers behind the sportsbook counter for a deep look at Super Bowls, blockbuster fights, sports-betting wise guys and whales, crooked casino owners and sportsbook operators, point-shaving players and bribed referees, and the battle for the control of the industry. Manteris also ushers readers into his own living room for the inside story of how being on the hook for millions of dollars every day of the year alters one's perspective on everything from parenting and family to religion." Inside the intriguing world of poker lies a fascinating exercise in strategy and extreme concentration--many of the same principles that underpin the one-thousand-year-old philosophy of Zen spirituality. Zen and the Art of Poker is the first book to apply Zen theories to America's most popular card game, presenting tips that readers can use to enhance their game. Among the more than one hundred rules that comprise this book, readers will learn to: * Make peace with folding * Use inaction as a weapon * Make patience a central pillar of their strategy * Pick their times of confrontation Using a concise and spare style, in the tradition of Zen practices and rituals, Zen and the Art of Poker traces a parallel track connecting the two disciplines by giving comments and inspirational examples from the ancient Zen masters to the poker masters of today.

Long considered the underground bible for beating the game, *Blackbelt in Blackjack* has already earned players millions and millions of dollars. Newly revised and updated, this step-by-step blueprint for beating the casinos reveals exclusive tips and tricks used by the pros-including shuffle tracking, team play, multiple deck camouflage techniques, betting strategies for beginning and advanced players, and much more. Twenty-one power-packed chapters, plus a complete course on beating blackjack: the devastating red seven count, the high-low count, the zen count, the true count, and so much more. 328 pages "The Georgian Art of Gambling" takes the reader on a miscellaneous tour through high and low society to reveal all aspects of gambling in the Georgian era. Descriptions of the most fashionable card and dice games of the day are interspersed with snippets of contemporary anti-gambling pamphlets, descriptions of the most famous (and degenerate) gambling houses, and accounts of the ruination of many high-profile aristocrats. "The Georgian Art of Gambling" covers wagering on sports such as cockfighting, bull baiting, boxing and cricket to the more sedentary pleasures of the card table. Both the civilised (card games portrayed in the novels of Jane Austen) and the debauched (card sharps and loaded dice) are explored, offering the reader a fascinating glimpse into the extent of gambling in Georgian Britain. RGE Publishing was founded in 1980 with the publication of our first book, *The Blackjack Formula* (now out of print), by Arnold Snyder. Since our inception, we have concentrated on casino blackjack, the only true game of skill among the casino table games, our primary aim to educate players about the methods professionals use to beat the casinos. We have published books, periodicals, technical reports, software and videos on this subject. More recently, we have begun to branch out into related topics, with a book due out this fall by two prominent attorneys on gambling laws, a controversial title this winter on how casinos cheat players, written by a former Nevada Gaming Control agent, and another this spring on how to beat slot machines. Although we intend to continue concentrating on various aspects of casino gambling, this fall we will be publishing our first non-gambling title, a parody: *The Seven Spiritual Laws of Making Big Bucks*. *Blackjack Wisdom* presents a selection of the most outrageous, controversial, irreverent, astute and simply hilarious rantings of blackjack's bad boy. Bishop Snyder skewers everyone involved with the casino industry, and in the process, he relays more honest, useful and valuable information about playing casino blackjack, than any other holy book on the subject. *World-wide survey of the art of gambling, in all its forms. The psychology of the dedicated gambler is examined. Over 400 illustrations. First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company. Games depicted include chess, riuette, billiards and cards. Presents biographies of the artists featured. Las Vegas art broker and reformed rebel Jonah Devine hasn't necessarily had an easy life, but his luck is about to change-or so he thinks. Working the Strip's upper tier, Jonah's quickly getting a taste for the flashy lifestyle of a Vegas whale and is starting to forget that there is a very distinct line separating him from his high-end clients. Cassie, on the other hand, has no misconceptions about her place in life. A runaway teen, she just wants to survive from one day to the next-which often seems like an errant hope. On the way to celebrating a career victory, Jonah witnesses Cassie being accosted and rescues her. But his good deed during a seemingly chance encounter sets off a chain reaction that may undo everything Jonah's worked for-and tugs at a web of deceit that will unravel his past as well as his future. When you discover you're a pawn, what's your next move? Do you believe in magic? Amp your untapped paranormal power to amass casino craps profits. Approaching casino gaming from a psychological point of view, readers learn how to deal with anger, identify unrealistic expectations, and manage the desire for revenge. Ex-professional football player Art Schlichter discusses his success in high school, college, and the NFL before succumbing to gambling addiction and serving time in prison for ten years. Mr. Tanzillo was born and raised on the North West side of Chicago. He went to Maywood Park and watched the Trotter's as a boy. He studied the history of Thoroughbred Racing and Handicapping for many years before placing his first wager. With the amount of time he studied he feels he's earned a PHD in Handicapping. His all-time favorite Jockey is the Late great Eddie 'The Master' Arcaro. His current favorite Jockey's are the Legendary Gary Stevens and of the new Breed 'Smokin' Joe Talamo. His favorite Trainers are Richard Mandella, Philip D'Amato, Mike Puype & Peter Miller. His favorite race tracks are Del Mar, where the 'Surf meets the Turf', Santa Anita Park and 'Big Sandy' Belmont Park. Money won is twice as sweet as money earned. Fortune backs the bold heart. If you aren't just a little scared when you enter a casino, you are either very rich or you haven't studied the games enough. For most men learn by losing. Gamblers will back their own opinions by a wager. Gambling is the surest way of getting nothing from something. The subject of gambling is all encompassing in the math universe. The games combine the psychology of the human attraction to risk with a natural play on instinct furthering his desire to know about his fate and his future. The race is not always to the swift nor the battle to the strong, but that is the way to bet. In a bet there is a fool and a thief. Taishik Chi was a war hero in South Korea. Captured twice as a Prisoner of War, Taishik Chi was sponsored by Bell Helicopters to study international business in the United States of America. He went on to graduate at Texas Christian University in Fort Worth, Texas where Taishik Chi earned an MBA in International Business. He went on to become a great accountant with his math skills. Math skills he put to work in the casinos of Las Vegas, Nevada. He now teaches his gaming skills online and at lectures across America. An architect and his wife living near a casino in Mississippi become hooked on gambling and lose everything they own. They move into his mother's house and embark on a new life, discovering happiness in simplicity and insecurity. The art of gambling, entertainment, relaxation and fun are now and forever...everybody gambles and enjoys God's blessings and protect God everywhere on all planets, galaxies, universes, and eternities!*
