This comprehensive reference expounds the current state of hormone therapy and castration resistance of prostate cancer (PCa). Previously, the incidence of PCa in Asian countries was relatively low, but it has been increasing dramatically in recent years. Although most of the new cases are diagnosed in early stages, a significant proportion of patients receive hormone therapy for metastatic disease or for relapse after local treatment. Thus the situation has gradually changed toward earlier and longer use of hormone therapy. The malignancy finally forms castration-resistant prostate cancer (CRPC) despite the lack of testicular androgen. With advances in understanding of the molecular basis of hormone dependence and CRPC, many new androgen receptor-targeted agents have emerged. During the last decade, much evidence on hormone therapy has been accumulated in Japan. Interestingly, some of these findings are different from those reported from Western countries, suggesting ethnic variation in the outcome of hormone therapy. In the chapters of this book, expert authors provide exhaustive interpretations of the evidence recently reported from Japan and provide important Asian perspectives on hormone therapy for PCa. This work benefits not only Asian urologists but also their Western counterparts and all physicians and medical personnel who are involved in the treatment of PCa. Essays exploring medieval castration, as reflected in archaeology, law, historical record, and literary motifs. This book is a printed edition of the Special Issue "AR Signaling in Human Malignancies: Prostate Cancer and Beyond" that was published in *Cancers Praise for Androgen Deprivation Therapy: "To my knowledge [this] is the only book written in plain language (no medical jargon) explaining what's happening during ADT, and detailing how to limit and often solve most associated side effects. It should be read by every man undergoing ADT, as well as family members and also healthcare providers. They will find all the details they need to get the most from this treatment..." Prof. N. Mottet, MD, PhD, Urologist, Medical Oncologist, Head of the Prostate Cancer Guidelines panel of the European Association of Urology Androgen Deprivation Therapy is the only guide written exclusively about the side effects of hormone therapy. The authors have collaborated with the European Association of Urology to produce this specially revised new edition to serve men affected by ADT across the globe. This comprehensive workbook for prostate cancer patients and their loved ones is filled with practical advice from experts in the field. The book covers a wealth of strategies to help men cope with ADT and maintain a good quality of life while on this treatment. It is not only an informational manual, but a guide for both patients and partners about ways to make changes in their lives that can keep them healthy and positive when the patient is on ADT. New to this Edition: Updates on the physical side effects of ADT and management strategies Expanded information on exercise and nutrition for men diagnosed with prostate cancer Updates on the primary drugs used to treat prostate cancer and extensive drug tables with common brand names worldwide Revisions throughout based on critical feedback from international medical experts in the field of prostate cancer and related disciplines Exercises, activities, worksheets, and other tools to promote discussion and inspire behavioural changes that can reduce the burden of ADT Officially endorsed by the European Association of Urology This study of eunuchs guides readers as they travel through various lands and periods, familiarizing themselves with the duties and responsibilities, the unspeakable torments and the passions and joys of these individuals. Eunuchs were not simply "bedchamber attendants", as the Greek term suggests. Nor were they always slaves. They*

could just as well be ascetics, priests, magicians, scholars, physicians, military commanders, admirals or senior officials at the courts of both eastern and western rulers. In the Byzantine empire, the only office they were precluded from attaining was that of emperor. The rich and varied forms of religious, social and sexual life associated with eunuchs and castrati embrace a wealth of myths relating to gods and demons, initiation rites, rituals and magic. They touch on the history of law and medicine, various systems of government, and secret societies. And they are presented to us in terms of the cruellest punishments and tortures. On the one hand, they facilitated unique developments in the evolution of vocal music, and on the other, they gave rise to a multiplicity of human behavioural patterns that reflect every aspect of good and evil. Readers should become acquainted with various forms of sexuality, such as androgyny, transvestism, transsexualism and homosexuality, and learn about the historical, religious and social issues associated with their characteristic "life settings". Whether out of a sense of shame or because of moral considerations, these phenomena appear only on the margins of the history of customs and mores. DIVAnalyzes how the body was constructed and politicized in early modern Italy by exploring literary discourses of the period - plays, novellas, travel journals, poems, etc./div This book illustrates that the Castration Complex and the question of the distinction between the sexes are enmeshed in psychoanalytic theories. The subjective negotiation of this distinction impacts the future sexual positions taken up (or not) by the subject, indicating that human sexuality is by no means a given or a natural occurrence in psychoanalysis. Engagement with the psychoanalytic theory of castration provides the reader with a different perspective on the current society's insistence on gradually dissolving the differences between the sexes. For Freud, castration complex is the key to understanding the psychical consequences of the anatomical distinction between the sexes. For Lacan, castration introduces the subject to his/her very existence as a sexed being. Mou Sultana illustrates how these two revolutionary theorists came to such conclusions by close reading of the core texts, interpreting them and highlighting their relevance both within and outside the clinic of modern times. Scenes of violence and incisions into the flesh inform the demand for law. The scene of little girls being held down in practices of female circumcision has been a defining and definitive image that demands the attention of human rights, and the intervention of law. But the investment in protecting women and little girls from such a cut is not all that it seems. *Law's Cut on the Body of Human Rights: Female Circumcision, Torture and Sacred Flesh* considers how such images come to inform law and the investment of advocates of law in an imagination of this scene. Drawing on psychoanalytic and postcolonial theory, and accompanying ideas in political theology, Juliet Rogers examines the language, imagery and excitement that accompanies recent initiatives to legislate against what is called 'female genital mutilation'. The author compliments this examination with a consideration of the scene of torture exposed in images from Abu Ghraib and Guantanamo Bay. Rogers argues that the modes of fascination and excitement that accompany scenes of torture and female circumcision betray the fantasy of a political condition against which the subject of liberal law is imagined; this is subjectivity in a state of non-mutilation, non-prohibition or, in a psychoanalytic idiom, non-castration. To support the fantasy of this subject, the mutilated subject, the authors suggests, is rendered as flesh cut from the democratic nation state, deserving of only selective human rights, or none at all. *The Castrato* is a nuanced exploration of why innumerable boys were castrated for singing between the mid-sixteenth and late-nineteenth centuries. It shows that the entire foundation of Western classical singing, culminating in bel canto, was birthed from an unlikely and historically unique set of desires, public and private, aesthetic, economic, and political. In Italy, castration for singing was understood through the lens of Catholic blood sacrifice as expressed in idioms of offering and renunciation and, paradoxically, in satire, verbal abuse, and even the symbolism of the castrato's comic cousin Pulcinella. Sacrifice in turn was inseparable from the system of patriarchy—involving teachers, patrons, colleagues, and relatives—whereby castrated males were produced not as nonmen, as often thought nowadays, but as idealized males. Yet what captivated audiences and composers—from Cavalli and Pergolesi to Handel, Mozart, and Rossini—were the extraordinary capacities of castrato voices, a phenomenon ultimately unsettled by Enlightenment morality. Although the castrati failed to survive, their musicality and vocality have persisted long past their literal demise. "As a psychoanalyst with massive humanistic erudition, Jacques Lacan has a great deal to offer any discipline concerned with the human condition. *The Play in the Mirror* seeks to bring together some of Lacan's fundamental concepts, primarily from his *Ecrits* and from Seminars 1, 2, 7, 11, and 20, as well as texts from ten Spanish Baroque comedias that also deal with the human condition." "The *Play in the Mirror* does not try to psychoanalyze characters, and its scope extends to spectators, readers, and literary critics who are also subject to the same lack, otherness, and desire. In a play, the subjects linked by the mirrors are the author and the spectator, brought together through language and desire through the theatrical performance. All plays and all critical articles are expressions of the desires of the creators. The critical act represents the intersubjective relationship, marked with the misunderstanding, defensiveness, rivalry, and attempts to dominate that characterize all dealings between two subjects. Even in criticism, the desire of the split subject insists." "Throughout the book, the focus is on the more philosophical underpinnings of both discourses. The premodern *comedia* and Lacan's postmodern perspective seem naturally to inform each other regarding the essential lack at the core of the human subject, the insistence of desire, and the inevitable failure of efforts to establish a unified subject, an orderly society, or a single valid interpretation of a literary text."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved The book "" Animal Castration, has been considered important throughout the human history, and so that this work is never forgotten we have made efforts in its preservation by republishing this book in a modern format for present and future generations. This whole book has been reformatted, retyped and designed. These books are not made of scanned copies and hence the text is clear and readable. This study of Catullus' Poem of Attis examines the peculiar rites belonging to the mysteries of Cybele and Attis and concentrates on the initiation of the Attis priest. Hardly any other religious rites seems so unfathomable to ordinary human behaviour than the self-castration of the priesthood associated to the Phrygian goddess Cybele and her consort Attis. This rite coincides with the myths, where Attis seized by frenzy, castrates himself. The motif was popular in Classical Antiquity and the most detailed and elaborated depiction is Catullus' *Carmen LXIII*, the Poem of Attis. Catullus here describes a vivid realization of an ecstatic religion from an empathic and penetrating psychological viewpoint. behaviour of the Attis priests, which reflect certain implications of a special religious concept, apparent and comprehensible for the passionate devotee. Catullus' Poem of Attis has the ambition to uncover the intention of the rite and the position of liminality which obviously were concerned with the way to salvation. This way was for the Attis priests to unman their bodies from the utter abhorrence of love. Eunuchism was a subject which both intrigued and embarrassed the ancient world. The special virtue attributed to the castrated male at court, of undistracted loyalty to his ruler, aided the promotion of numerous eunuchs to positions of great power. A literary discourse developed, reviling and sometimes defending the eminence of these 'half-men'. Here, thirteen new studies from an international cast explore how eunuchs were perceived, and also reconstruct the realities of eunuchs' lives in Greek, Roman, Byzantine and Eastern culture. For much of Chinese history, the eunuch stood out as an exceptional figure at the margins of gender categories. Amid the disintegration of the Qing Empire, men and women in China began to understand their differences in the language of modern science. In *After Eunuchs*, Howard Chiang traces the genealogy of sexual knowledge from the demise of eunuchism to the emergence of transsexuality, showing the centrality of new epistemic structures to the formation of Chinese modernity. From anticastration discourses in the late Qing era to sex-reassignment surgeries in Taiwan in the 1950s and queer movements in the 1980s and 1990s, *After Eunuchs* explores the ways the introduction of Western biomedical sciences transformed normative meanings of gender, sexuality, and the body in China. Chiang investigates how competing definitions of sex circulated in science, medicine, vernacular culture, and the periodical press, bringing to light a rich and vibrant discourse of sex change in the first half of the twentieth century. He focuses on the stories of gender and sexual minorities as well as a large supporting cast of doctors, scientists, philosophers, educators, reformers, journalists, and tabloid writers, as they debated the questions of political sovereignty, national belonging, cultural authenticity, scientific modernity, human difference, and the power and authority of truths about sex. Theoretically sophisticated and far-reaching, *After Eunuchs* is an innovative contribution to the history and philosophy of science and queer and Sinophone studies. Traditional readings of "Dubliners" have entrapped themselves in easy identifications with the narrator in the stories. Later critics have used strong overarching theories to explore the techniques through which the narrator produces these reductive effects. This study applies a different contemporary theoretical lens to each of the stories. Interprets Mailer's fiction in much the same way as Freud analyzed the meaning of dreams in *The Interpretation of Dreams*. Applies the theories of human development and personality elaborated by such post-Freudians as Otto Fenichel, Melanie Klein and Erik Erikson and considers Mailer's own use in his fiction of the hypotheses of Freud and of Wilhelm

Reich. Opinions are like flare, which can turn either way: they can spread like wild fire or encapsulate themselves within the bounds of personal integrity, and thus illuminate. I started writing opinions in the late 2008 through my blogs. I admit at times I did go wild with unsubstantiated accusations and surmises, leading to risky speculations and irresponsible opinions. Recently, I published a comprehensive book of my writings entitled *Writings @ Ankur Mutreja*, and the present book is a short selection of my opinions presented therein with emphasis on responsible writing. I am an advocate by profession; therefore, most of my opinions have a tint of law; in the first part, the expression is simple; so, it is for lay persons who won't mind a little exercise of mind in the legal arena; whereas, in the second part, I have gone whole hog with law, and I admit those without formal legal training may find it convenient to ignore. My style of writing is terse and pointed, but at times I have gone overboard like in one particular opinion on Aarushi murder, where emotions and logic intermingled in an expanded narrative. Rights, especially privacy and equality, are my area of focus; therefore most of my opinions herein; i.e., the ones discussing Brain Research, NCTC, Sting Operations, LGBTs, Prostitution, SC/ST quotas, and AADHAR/NPR; are focused on these two areas. In my selection, I have tried steering clear of politics, but politics is nevertheless all encompassing; however, one opinion on tussle between Delhi Police and AAP is majorly political; another political opinion, but with a strong emphasis on law, is the discussion of Zakia Jaffrey case. There were few very big events in the recent past; one amongst them is the Nirbhaya murder, and I have also discussed it, though my take is slightly different: I think the murder has been manipulated by the vested interests. I am a resident of an unauthorized colony; therefore, my opinion on Unauthorized Colonies has found place in the present selection; though I admit had the case been different, I wouldn't have included it; so please bear with my little bias. Though I have no expertise in international affairs, I have taken a plunge into it albeit within the ambit of my legal training; the topics discussed are Indo-Pak relationship and Julian Assange. Finally, in the second part, I have discussed various judgments and laws. I would recommend anybody to read at least my critique of Aarushi Judgement. Other than that I have critiqued Binayak Sen Judgement and Aruna Shaunbaug Judgement. In the second part, I have also critiqued RTI Act and Amendments in IPC post Nirbhaya murder. This is a non-professional endeavor; therefore, you may be able to download it either free or for a small price, and the royalties, if any, accumulating where from will go in charity. Enjoy Reading! Recent Results in Cancer Research: Hormones and Human Breast Cancer provides information pertinent to the fundamental aspects of breast cancer and hormones. This book discusses the endocrine factors involved in breast cancer. Organized into two parts encompassing 11 chapters, this book begins with an overview of the process of castration as an effective therapeutic measure in many pre-menopausal patients with advanced breast cancer. This text then discusses the response rate following ablation wherein only 60 percent of patients subjected to hormone therapy as a first treatment for recurrence will survive to ablation. Other chapters consider the microscopical features of a tumor. This book discusses as well the prescription of corticosteroids as treatment, which originates from the mechanism of response that followed adrenalectomy or hypophysectomy. The final chapter deals with the use of radio-immunoassay methods in treating breast cancer. This book is a valuable resource for biochemists, scientists, and physicians. In this admirably objective and lucid exposition, the author examines from a medico-legal standpoint the comparative position in various countries, particularly in the UK and the USA, of currently controversial medical procedures: voluntary sterilisation, compulsory sterilisation and castration, trans-sexualism, experimentation, transplantation, and euthanasia - few of which, if any, enjoy a settled or clearly defined place in the eyes of the law. He considers the problems from two perspectives: first, that of the individual in society and how far he himself may determine the extent of physical intrusion on his body; secondly, that of the state or society and how far it may impose or limit medical intrusion on the human body. Thus, Mr. Meyers provides a valuable account, not only of current medical attitudes, but also of relevant case and statute law as it stands at present. It is inherent in the nature of this book that it should arouse controversy and argument. There are many important questions to be debated: Has the state the right to enforce its conception of morality without showing that the behaviour it proscribes has a harmful effect on other members of society? To what extent does consent by the individual concerned insulate a surgeon from criminal liability? In connection with compulsory sterilisation, who is to judge those unfit to procreate? What is a proper definition of medical experimentation? What constitutes death? If a man has a right to live has he not an equal right to die? These are a few of the issues raised. The author has not hesitated to express his own opinions but has clearly relegated them to the summary at the end of each chapter, thereby leaving the objectivity of his main text unimpaired.

David W. Meyers is a practicing lawyer in California, with American and British legal qualifications at the firm of Dickenson, Peatman & Fogarty. He has taught at the University of Edinburgh Law School and the University of Tasmania Law School as well as Dave Hitz likes to solve fun problems. He didn't set out to be a Silicon Valley icon, a business visionary, or even a billionaire. But he became all three. It turns out that business is a mosaic of interesting puzzles like managing risk, developing and reversing strategies, and looking into the future by deconstructing the past. As a founder of NetApp, a data storage firm that began as an idea scribbled on a placemat and now takes in \$4 billion a year, Hitz has seen his company go through every major cycle in business—from the Jack-of-All-Trades mentality of a start-up, through the tumultuous period of the IPO and the dot-com bust, and finally to a mature enterprise company. NetApp is one of the fastest-growing computer companies ever, and for six years in a row it has been on Fortune magazine's list of Best Companies to Work For. Not bad for a high school dropout who began his business career selling his blood for money and typing the names of diseases onto index cards. With colorful examples and anecdotes, *How to Castrate a Bull* is a story for everyone interested in understanding business, the reasons why companies succeed and fail, and how powerful lessons often come from strange and unexpected places. Dave Hitz co-founded NetApp in 1992 with James Lau and Michael Malcolm. He served as a programmer, marketing evangelist, technical architect, and vice president of engineering. Presently, he is responsible for future strategy and direction for the company. Before his career in Silicon Valley, Dave worked as a cowboy, where he got valuable management experience by herding, branding, and castrating cattle. The intellectual movements of psychoanalysis, postmodernism, and feminism have redefined the ways in which we think about human experience. And yet, an integration of these movements has been elusive, if not impossible. In this landmark book, J.C. Smith and Carla J. Ferstman combine these disparate traditions to create a provocative, unified, and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory. The dialectics of domination and submission are central to Smith and Ferstman's argument. Men and women, they insist, must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche, or, in Nietzsche's terms, the Will to Power. They argue that the unification of psychoanalysis, postmodernism, and feminism leads us to a shocking conclusion—that women and men cannot move beyond the suffering which so haunts the human condition, unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women. And women, conversely, must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality. A work of tremendous insight and extraordinary intellectual energy, *The Castration of Oedipus* will provoke strong reactions in all readers regardless of ideology. "Castration is a history of the meaning, function, and act of castration from its place in the words of Jesus in the Gospel According to Matthew and the early Church - where Augustine and the Fathers shaped the basic philosophic concepts of sexuality and chastity - to its secular reinvention in the Renaissance and its twentieth-century position at the core of psychoanalysis." "Taylor connects castration to the ancient (and continuing) human drive to re-engineer our own biology. In the medieval love story of Abelard and Heloise a violent castration makes Abelard a better theologian. In the year 2000 a sterile but otherwise functioning man is a boon to the woman who desires sex without the burdens of pregnancy." "Ranging from allegory to zooarchaeology, Castration turns an unusual and discomfiting topic into a thoroughly enjoyable narrative on man's obsessive relationship to his genitals, his sexuality, and his manhood."--Jacket. An account of many aspects of medical practice and the law. Dealing with such controversial areas as genetic engineering, fetal rights, transplantation, euthanasia, artificial reproduction, and medical examination, Meyers gives a breakdown of current debates and legal decisions in England, Scotland and the US. First published in 1970. Annotation copyrighted by Book News, Inc., Portland, OR Sexual mutilation is a global problem that affects 15. 3 million children and young adults annually. In terms of gender, 13. 3 million boys and 2 million girls are involuntarily subjected to sexual mutilation every year. While it is tempting to quantify and compare the amount of tissue removed from either gender, no ethical justification can be made for removing any amount of flesh from the body of another person. The violation of human rights implicit in sexual mutilation is identical for any gender. The violation occurs with the first cut into another person 's body. Although mutilation is a strong term, it precisely and accurately describes a condition denoting "any disfigurement or injury

by removal or destruction of any conspicuous or essential part of the body. " While such terms as "circumcision" and "genital cutting" are less threatening to our sensitivities, they ultimately do a disservice by masking the fact of what is actually being done to babies and children. Although the courageous example of the survivors of sexual mutilation indicates that humans can certainly live and even re produce without all of their external sexualorgans, this biological phenomenon does not, however, justify subjecting a person to sexual mutilation. The remarkable resilience of the human body is a testament to the importance nature places on reproduction rather than a vindication for surgical practices that compromise this function. Behind the extraordinary sound of the voice of 'the last castrato' lies a strange and lonely life lived in the shadow of great events and institutions, a personality glimpsed by inference and allusion. Of the many sects that broke from the official Russian Orthodox church in the eighteenth century, one was universally despised. Its members were peasants from the Russian heartland skilled in the arts of animal husbandry who turned their knives on themselves to become "eunuchs for the kingdom of heaven's sake." Convinced that salvation came only with the literal excision of the instruments of sin, they were known as Skoptsy (the self-castrated). Their community thrived well into the twentieth century, when it was destroyed in the Stalinist Terror. In a major feat of historical reconstruction, Laura Engelstein tells the sect's astonishing tale. She describes the horrified reactions to the sect by outsiders, including outraged bureaucrats, physicians, and theologians. More important, she allows the Skoptsy a say in defining the contours of their history and the meaning behind their sacrifice. Her deft handling of their letters and notebooks lends her book unusual depth and pathos, and she provides a heartbreaking account of willing exile and of religious belief so strong that its adherents accepted terrible pain and the denial of a basic human experience. Although the Skoptsy express joy at their salvation, the words of even the most fervent believers reveal the psychological suffering of life on society's margins. No foreign tribe or exotic import, the sect drew its members from the larger peasant society where marriage was expected and adulthood began with the wedding night. Set apart by the very act that guaranteed their redemption, these "lambs of God" became adept at concealing their sectarian identity as they interacted with their Orthodox neighbors. Interaction was necessary, Engelstein explains, since the survival of the Skoptsy depended upon recruitment of new members and on success in agriculture and trade. Realizing that some prejudices have changed little over the centuries, Engelstein cautions that "we must not cast the shadow of our own distress on the story of the Skoptsy. Their physical suffering was something they willingly embraced." In *Castration and the Heavenly Kingdom*, she has produced a remarkable history that also illuminates the mysteries of the human heart. A book about human sexuality by Daniel Rancour-Laferriere, in which the author discusses topics including castration anxiety and the female orgasm. The work has been called a classic. In a sweeping saga of music and vengeance, the acclaimed author of *The Vampire Chronicles* draws readers into eighteenth-century Italy, bringing to life the decadence beneath the shimmering surface of Venice, the wild frivolity of Naples, and the magnetic terror of its shadow, Vesuvius. This is the story of the castrati, the exquisite and otherworldly sopranos whose graceful bodies and glorious voices win the adulation of royal courts and grand opera houses throughout Europe. These men are revered as idols—and, at the same time, scorned for all they are not. Praise for Anne Rice and *Cry to Heaven* "Daring and imaginative . . . [Anne] Rice seems like nothing less than a magician: It is a pure and uncanny talent that can give a voice to monsters and angels both."—*The New York Times Book Review* "To read Anne Rice is to become giddy as if spinning through the mind of time."—*San Francisco Chronicle* "If you surrender and go with her . . . you have surrendered to enchantment, as in a voluptuous dream."—*The Boston Globe* "Rice is eerily good at making the impossible seem self-evident."—*Time* What are the connections between cattle branding and Christian salvation, between livestock castration and square dancing, between cattle rustling and the making of spurs and horsehair bridles in prison, between children's coloring books and cowboy poetry as it is practiced today? *The Cowboy* uses literary, historical, folkloric, and pop and cultural sources to document ways in which cowboys address religion, gender, economics, and literature. Arguing that cowboys are defined by the work they do, Allmendinger sets out in each chapter to investigate one form of labor (such as branding, castration, or rustling) in the cowboy's "work culture". He looks at early oral poems recited around campfires, on trail drives, at roundups, and at home in ranch bunkhouses, and at later poems, histories, and autobiographies written by cowboys about their work - most of which have never before received scholarly attention. Allmendinger shows how these texts address larger concerns than the work at hand - including art, morality, spirituality, and male sexuality. In addition to spotlighting little-known texts, art, and archival sources, *The Cowboy* examines the works of Mark Twain, John Steinbeck, Willa Cather, Louis L'Amour, Larry McMurtry, and others. Unique among studies of the American cowboy, Allmendinger's study looks at what cowboys thought of themselves, and the ways in which they represented those thoughts in their own prose, poetry, and artifacts. Richly illustrated with photographs of cowboys at work and at play, many previously unpublished, *The Cowboy* will interest scholars of American literature and history, and American Studies, as well as those interested in Western history and culture, folklore, and gender studies.
