At the Dragon's Gate Oct 22 2022 In the early days of World War II, a young Marine named Charles Fenn was recruited by the Office of Strategic Services (OSS) for undercover operations in the China-Burma-India theatre. Fenn knew exactly what it took to get the job done. His wartime exploits are the stuff of legend, but not even his OSS compatriots knew the full extent of his espionage activities. Fenn's skill as a spy is matched by his talent as a storyteller, and this witty, elegantly written account of his OSS days not only adds to the historical record, it makes for a compelling read.

Poetics of Slow Cinema Jun 25 2020 This book discusses slow cinema, a contemporary global production trend that has recently gained momentum in film theory and criticism. Slow films dispense with narrative progression in favour of a contemplative mood, which is stretched out to the extreme in order to impel viewers to confront cinematic temporality in all its undivided glory. Despite its critical reputation as an oblique mode of film practice, slow cinema continues to attract, challenge and provoke audiences. Focusing on filmmakers Béla Tarr, Tsai Ming-liang and Nuri Bilge Ceylan, this book identifies nostalgia, absurd humour and boredom as intrinsic dimensions of slow cinema and explores the ways in which these directors negotiate local filmmaking conventions with the demands of a global cinophile niche. As the first study to treat slow cinema both as an aesthetic style and as an institutional discourse, *Poetics of Slow Cinema* offers an illuminating perspective on the tradition's historical genealogy and envisions it with a Janus-faced disposition in the age of digital technologies—lamenting at once the passing of difficult, ambiguous modernist film and capitalizing on the

yearning for its absence.

The Dragon's Underbelly Jun 06 2021 This book shows why Vietnam has not become the dragon it is often touted to be. The team of authors include both long-time observers and junior scholars who present cutting-edge research on the latest trends as well as major challenges facing the country's economy and political system. As Vietnam seeks to escape from poverty and the legacies of mistaken socialist policies, its economy has become fully integrated into the global economy. Yet, without an effective and far-sighted leadership, it is still occupying a low position in the global value chains and becoming increasingly dependent on China. Politically, after three decades of reform, the Vietnamese Communist Party's grip on power has well adapted to the market economy, but is confronting deep vulnerabilities as observed in its eroding ability to control workers, the media, public universities, and state-owned enterprises. The book also includes a section that applies formal and statistical methods to compare Vietnam with China in two critical areas of political accountability and anti-corruption policy.

Fictitious & Symbolic Creatures in Art Oct 10 2021 DigiCat Publishing presents to you this special edition of "Fictitious & Symbolic Creatures in Art" (With Special Reference to Their Use in British Heraldry) by John Vinycomb. Komodo Dragons May 17 2022 More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

The Dragon's Triangle Feb 14 2022 This is the true story of the first nonstop transpacific flight that took place from Japan to the United States in 1931. The complexity and length of the flight was even greater than the Lindbergh flight that occurred in 1927. During this time and while the preparations for the flight were planned, the cloud of war was descending over the world. The Japanese had just invaded Manchuria. The world was in

an economic depression. Amelia Earhart grabbed the headlines a few months later in 1932 as the first woman to fly nonstop across the Atlantic.

Chasing the Dragon's Tail Mar 15 2022 The text introduces Dr Manaka's major clinical and theoretical accomplishments by describing how the 'X-signal system' is the foundation of human topography, function, and response. In essence, the X-signal system defines qi, yin-yang, and the five phases as clinical events, rather than as abstract theories. The text gives Western readers the first complete description of this treatment system.
