American Dreams Nov 23 2022 In 1956, presidential-hopeful Marco Rubio's parents came to America as poor immigrants and found a land of opportunity where anyone could build a better future. But now the American Dream is on life support. Millions of Americans have been left behind by an economy that doesn't value their skills and a government that would rather give them a handout than a hand up. In *American Dreams* Rubio offers a roadmap for restoring the land of opportunity. He explains why America now stands at a critical junction and offers a detailed economic plan to help rebuild it.

International Migration and Economic Development Jan 21 2020 "This accessible and topical book offers insights to policy makers in both industrialized and developing countries as well as to scholars and researchers of economics, development, international relations and to specialists in migration."--BOOK JACKET.

The War on Poverty, the Economic Opportunity Act of 1964 Sep 21 2022

If Not Me, Then Who? Jun 25 2020 President Jimmy Carter Few people in America have had such a wide range of exciting experiences as Cabell Brand. He used his experiences as an accomplished business leader to form a remarkable partnership between governments at all levels and his own local community. This brief but profound text will prove beneficial to all young people who wish to follow in his footsteps in strengthening American society in areas of their own individual interest and competence. US Senator Mark Warner - Former Governor of Virginia Cabell Brand

is a dear friend who I've come to know both as a leader in business and as a role model in his community. The personal stories and experiences he so generously shares in this book, on issues ranging from education to health care and the environment, provide a compelling and readable case for more civic engagement from everyone. What's more Cabell's life story provides a useful guide for the next generation of leaders to step-up to continue his legacy of working to provide opportunities for everyone. President of the National Academy of Sciences, Ralph Cicerone Cabell Brand is an accomplished leader whose adherence to American ideals and his effectiveness make him rare. Even more rare, he demonstrates through genuine and encouraging experiences that many more people can become new leaders in our quest for better governance and a better society. An uplifting book. VMI Superintendent General J.H. Binford Peay, III, U.S. Army (Retired) Cabell Brand's life exemplifies the concept of the citizen-soldier, the foundation upon which his alma mater, the Virginia Military Institute, was built. He served his country during World War II before embarking on a remarkable career in business, with simultaneous involvement at home and abroad as regards humanitarian causes. I have known few individuals who have been as successful in industry while giving so selflessly of their time and effort with civic affairs, the underprivileged, the environment and the general well being of mankind.

Appalachian Legacy Apr 23 2020 In 1964 President Lyndon Johnson traveled to Kentucky's Martin County to declare war on poverty. The following year he signed the Appalachian Regional Development Act, creating a state-federal partnership to improve the region's economic prospects through better job opportunities, improved human capital, and enhanced transportation. As the focal point of domestic antipoverty efforts, Appalachia took on special symbolic as well as economic importance. Nearly half a century later, what are the results? Appalachian Legacy provides the answers. Led by James P. Ziliak, prominent economists and demographers map out the region's current status. They explore important questions, including how has Appalachia fared since the signing of ARDA in 1965? How does it now compare to the nation as a whole in key categories such as education, employment, and health? Was ARDA an effective place-based policy for ameliorating hardship in a troubled region, or is Appalachia still mired in a poverty trap? And what lessons can we draw from the Appalachian experience? In addition to providing the reports of important research to help analysts, policymakers, scholars, and regional experts discern what works in fighting poverty, Appalachian Legacy is an important contribution to the economic history of the eastern United States.

Financing Economic Development in the 21st Century Jul 27 2020 Selected Contents: Part 1. Introduction1. Local Economic Development and Its Finance: An Introduction, Stephen Malpezzi2. Staircases or Treadmills? Feb 14 2022 Globalization, technological change, and deregulation have made the American marketplace increasingly competitive in recent decades, but for many workers this “new economy” has entailed heightened job insecurity, lower wages, and scarcer benefits. As the job market has grown more volatile, a variety of labor market intermediaries—organizations that help job seekers find employment—have sprung up, from private temporary agencies to government “One-Stop Career Centers.” In *Staircases or Treadmills?* Chris Benner, Laura Leete, and Manuel Pastor investigate what approaches are most effective in helping workers to secure jobs with decent wages and benefits, and they provide specific policy recommendations for how job-matching organizations can better serve disadvantaged workers. *Staircases or Treadmills?* is the first comprehensive study documenting the prevalence of all types of labor market intermediaries and investigating how these intermediaries affect workers’ employment opportunities. Benner, Leete, and Pastor draw on years of research in two distinct regional labor markets—“old economy” Milwaukee and “new economy” Silicon Valley—including a first-of-its-kind random survey of the prevalence and impacts of intermediaries, and a wide range of interviews with intermediary agencies’ staff and clients. One of the main obstacles that disadvantaged workers face is that social networks of families and friends are less effective in connecting job-seekers to stable, quality employment. Intermediaries often serve as a substitute method for finding a job. Which substitute is chosen, however, matters: The authors find that the most effective organizations—including many unions, community colleges, and local non-profits—actively foster contacts between workers and employers, tend to make long-term investments in training for career development, and seek to transform as well as satisfy market demands. But without effective social networks to help workers locate the best intermediaries, most rely on private temporary agencies and other organizations that offer fewer services and, statistical analysis shows, often channel their participants into jobs with low wages and few benefits. *Staircases or Treadmills?* suggests that, to become more effective, intermediary organizations of all types need to focus more on training workers, teaching networking skills, and fostering contact between workers and employers in the same industries. A generation ago, rising living standards were broadly distributed and coupled with relatively secure employment. Today, many Americans fear that heightened job insecurity is overshadowing the benefits of dynamic economic growth. *Staircases or Treadmills?* is a stimulating guide to how private and public job-matching institutions can empower disadvantaged workers to share in economic progress.

Community Economic Development Aug 08 2021 This important book examines the ways in which community economic development can contribute to local and regional regeneration. It presents a unique overview of the state of contemporary British practice in this important policy area and provides a series of fresh, theoretical, methodological and empirical insights which help us to understand ways in which communities are facing up to the challenges of devising and bringing about their own revitalisation. Community Economic Development is underpinned by the argument that much conventional regeneration work represents at best a short-term fix rather than a long-term sustainable solution to the problems of socially excluded communities. The emphasis of the book is largely on the British experience with contributions from a rich mix of new and established academics and practitioners.

The Growth Map Jun 18 2022 Jim O'Neill, one of the most influential economists today, shares his insights on how and why he developed one of the most compelling economic concepts of our time in *The Growth Map*. 'O'Neill has redefined how investors and Western business leaders see the world. This book tells the unlikely story of how O'Neill developed this path-breaking idea . . . lively, powerful and highly accessible' Gillian Tett, *Financial Times* Ten years ago, Jim O'Neill predicted that globalization would help Brazil, Russia, India and China (the BRICs) - busy, ambitious countries full of raw materials - overtake the largest Western economies. With all four BRIC nations set to do just that, no other idea has proved as significant for the new century. But these changes have provoked business and political uncertainty and in *The Growth Map* O'Neill examines what is coming next. Can the BRICs sustain their exceptional growth? Which nations will come next? And what, for all of us, does the future hold? 'Goldman Sachs' rock star' *Business Week* 'Sharp, shrewd. Tells the big story of our time. The fundamental shift of economic power from the West' Niall Ferguson 'O'Neill has changed how the world thinks about economic growth - and how the BRICs think about themselves' Lloyd Blankfein, Chairman And Ceo, Goldman Sachs 'One of the most sought-after economic commentators on the planet' *Daily Telegraph* Jim O'Neill is Chairman of Goldman Sachs Asset Management. He joined Goldman Sachs in 1995, rising to chief economist, and in 2001 he led the team that conducted the original BRIC analysis. He is chairman of the charity SHINE, and a member of the boards of the UK Royal Economic Society, Itinera and Bruegel. He has a lifelong passion for Manchester United FC, and has served as a non-executive director of the club's board.

Creating an Opportunity Society May 17 2022 Americans believe economic opportunity is as fundamental a right as life, liberty, and the pursuit

of happiness. More concerned about a level playing field for all, they worry less about the growing income and wealth disparity in our country. Creating an Opportunity Society examines economic opportunity in the United States and explores how to create more of it, particularly for those on the bottom rungs of the economic ladder. Ron Haskins and Isabel Sawhill propose a concrete agenda for increasing opportunity that is cost effective, consistent with American values, and focuses on improving the lives of the young and the disadvantaged. They emphasize individual responsibility as an indispensable basis for successful policies and programs. The authors recommend a three-pronged approach to create more opportunity in America: • Increase education for children and youth at the preschool, K–12, and postsecondary levels • Encourage and support work among adults • Reduce the number of out-of-wedlock births while increasing the share of children reared by their married parents With concern for the federal deficit in mind, Haskins and Sawhill argue for reallocating existing resources, especially from the affluent elderly to disadvantaged children and their families. The authors are optimistic that a judicious use of the nation's resources can level the playing field and produce more opportunity for all. Creating an Opportunity Society offers the most complete summary available of the facts and the factors that contribute to economic opportunity. It looks at the poor, the middle class, and the rich, providing deep background data on how each group has fared in recent decades. Unfortunately, only the rich have made substantial progress, making this book a timely guide forward for anyone interested in what we can do as a society to improve the prospects for our less-advantaged families and fellow citizens.

Race and Economic Opportunity in the Twenty-First Century Feb 02 2021 Examining the crucial topic of race relations, this book explores the economic and social environments that play a significant role in determining economic outcomes and why racial disparities persist. With contributions from a range of international contributors including Edward Wolff and Catherine Weinberger, the book compares how various racial groups fare and are affected in different ways by economic and social institution. Themes covered in the book include: the economic status of various racial and ethnic groups, including their progress or retrenchment over the years how the law, economic motivations, and increased competition for jobs affect racial disparities. This is an invaluable resource for researchers and academics across a number of disciplines including political economy, ethnic and multicultural studies, Asian studies, and sociology.

Reclaiming the American Dream Mar 27 2023 A blueprint for community-based solutions to economic inequality in America. Contrary to popular belief-and despite widespread pessimism that the American Dream is a dying concept-solutions that can remake the United States into the land of economic opportunity for all already exist. Over the past ten years, Ben Hecht has watched leaders in local communities, fed up with the political paralysis in Washington, D.C., and unable to ignore growing disparities in their own backyards, experiment with new ways of solving old problems. The twelve strategies highlighted in this book emerged from that experimentation. Taken together, they outline a blueprint for a new way of working that will rekindle the promise of America everywhere: better education, increased income and wealth, expanded access to opportunity, and more. These strategies are not academic theories or one-offs only possible in wealthy, coastal cities. Each strategy has been proven to get results time and time again-many of them, in fact, in hundreds of urban and rural communities. --
