Chemical Looping Systems for Fossil Energy Conversions Feb
02 2021 This book presents the current carbonaceous fuel
conversion technologies based on chemical looping concepts
in the context of traditional or conventional technologies.
The key features of the chemical looping processes, their
ability to generate a sequestration-ready CO₂ stream, are
thoroughly discussed. Chapter 2 is devoted entirely to the
performance of particles in chemical looping technology and
covers the subjects of solid particle design, synthesis,
properties, and reactive characteristics. The looping
processes can be applied for combustion and/or gasification
of carbon-based material such as coal, natural gas,
petroleum coke, and biomass directly or indirectly for
steam, syngas, hydrogen, chemicals, electricity, and liquid
fuels production. Details of the energy conversion
efficiency and the economics of these looping processes for
combustion and gasification applications in contrast to
those of the conventional processes are given in Chapters 3,
4, and 5. Finally, Chapter 6 presents additional chemical

looping applications that are potentially beneficial, including those for H2 storage and onboard H2 production, CO2 capture in combustion flue gas, power generation using fuel cell, steam-methane reforming, tar sand digestion, and chemicals and liquid fuel production. A CD is appended to this book that contains the chemical looping simulation files and the simulation results based on the ASPEN Plus software for such reactors as gasifier, reducer, oxidizer and combustor, and for such processes as conventional gasification processes, Syngas Chemical Looping Process, Calcium Looping Process, and Carbonation-Calcination Reaction (CCR) Process. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Standard Catalog of Farm Tractors 1890-1980 Mar 27 2023 Tractor enthusiasts of any era will appreciate the wealth of technical data this comprehensive resource delivers. This expanded 2nd edition fuses familiar and reliable Standard Catalog data with results from the renowned Nebraska Tractor Tests, for the extended coverage savvy enthusiast need. Four grades of prices for most models, and updated prices for tractors of the 1960s and later, assist collectors in evaluating each model. Technical specifications including engine size, weight, performance ability and options offer a more depth report. Additional performance reports from the

standard Nebraska Tractor Tests add to a solid foundation of information to create a resource that's second to none. • Information on tractors manufactured from 1890 to 1960 guides collectors through various generations of tractors • Updated prices for post-1960 models helps collectors remain updated • 1,800 detailed archive photos help enthusiasts identify various models
