Discovering Lavalette May 05 2021 How did a small village get such an unusual name? The answer would reveal the secret to one of the best kept secrets in Appalachian history. The answer had been woven into the fabric of day to day life hiding the invisible threads of humanity and history long passed away. Or had they? Those threads, once illuminated, led back to a transplanted ancient culture left curiously intact, a whirlwind 19th century Caribbean romance and a gifted thinker that reflect the true spirit of a culture known for their independent mind. Discovering Lavalette-Commemorative Village Edition is the multi-dimensional cultural biography of a small southern Appalachian village and its humble people. Introductions include photographs and oral histories from the earliest settlers, their adventures with Colonial America, the American Civil War, the coming of the Industrial Age.

Flexibility Measurement within the Service industry Feb 20 2020
Inhaltsangabe:Introduction: The following thesis was conducted within the confines of Berco Express and seeks to develop a flexibility measurement methodology. Spearheading the introduction of Berco Express, a Logistics Service Provider (LSP), operating in the South African Transportation industry. Company Profile: Berco Express (BE) is part of Berco Logistics Services (BLS), a wholly owned subsidiary of

the Berco Group, a privately owned company established in 1992. The vision and passion of all the people of this company is to make BLS the customer's logistics service provider of choice. BE started its courier operation in 1992 and has since grown into a medium sized organisation with 16 branches nationally in South Africa (SA), employing close to 1000 people and over 250 vehicles. Additionally under the BLS umbrella included are the two complimentary divisions Active Warehousing and Clearing & Forwarding. BE standard Courier Services embracing dedicated distribution, domestic and international consignments. In conjunction with the Global Distribution Alliance Network (GDA) all major cities worldwide as well as thousands of towns in more than 220 countries are served. Active Warehousing a newer division is offering in 4 warehouse facilities (Cape town, Durban, Johannesburg and Pretoria) the services below: Receiving, Inventory Management, Order Processing, High Value Store, Value added Services; Services primarily emphasize product flow rather than storage. Revenue contribution from the clearing and forwarding division is based on Business operations in the field of Airfreight, Ocean Freight, Multi-modal solutions, Import & Export and Customs Clearance. The intellectual capital of the BLS group comprises specialists in courier, warehousing, distribution, clearing & forwarding, management information systems, project management and account/contract management. With a contribution of R 210,000,000 to the Total Berco Group Revenue for 2005 and an annual average growth rate of 35% over the previous five years BE has been established a sustainable position within both the Berco Group and the industry. Continuous improvement esteemed as the platform for Excellence has been implemented to guarantee BE's drive towards Service Excellence. SA's transport industry recorded in 2006 a total income of approximately R 160 000 million. This presents an increase of 7.1% p.a. over the income reported to the corresponding survey of 2002. The transport [...]

Routledge Handbook of Ecosystem Services Nov 11 2021 The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts.

Total Value Development: How To Drive Service Innovation Jul 19 2022 Total Value Development provides a framework to help businesses innovate and derive greater value from the services they offer. The secret is to devise an innovative model built on total value creation, identified as the total value development (TVD) model. The TVD model has broad applicability for any large organization. Here, case studies are presented showing the effectiveness of the TVD model in its practical application within companies. Statistical evidence is used to recommend improvements to performance outcomes, such as time compression, cost reduction, quality and innovation. Studies of over 100 service enterprises in the United States and the United Kingdom provide compelling evidence for benefits from business model innovation. Additional material in the form of guidance forms give readers the tools needed for the implementation and recording of successful in-project value development. Providing both a practical framework and real-life examples of adding value to current business practices, this book is essential reading for executives, managers and researchers in the field of business and innovation.

The Handbook of Service Innovation Apr 28 2023 Bringing together some of the world ' s leading thinkers, academics and professionals to provide practitioners, students and academicians with comprehensive insights into implementing effective service innovation. This book presents service innovation holistically and systemically across various service areas, including health, education, tourism, hospitality, telecommunications, and retail. It addresses contemporary issues through conceptual and applied contributions across industry, academia, and government, providing insights for improved practice and policy making. Featuring cutting-edge research contributions, practical examples, implementations and a select number of case

studies across several growth service industries, this book also includes examples of failed service innovation attempts in order to demonstrate a balanced view of the topic and to make clear the pitfalls to be avoided. Culminating in a suggested step-by-step guide to enable service organization ' s managers to understand and implement the concepts of service innovation and manage its evolutionary processes effectively, this book will prove a valuable resource to a wide reaching audience including researchers, practitioners, managers, and students who aspire to create a deeper scientific foundation for service design and engineering, service experience and marketing, and service management and innovation. Includes endorsements from professionals in the field of service innovation.

Productivity, Innovation and Knowledge in Services May 17 2022
Written by some of the most distinguished authors in the field, this book elucidates the critical and complex relationships between services, production and innovation. The authors discuss the limitations of current theories to explain service productivity and innovation, and call for a conceptual re-working of the ways in which these are measured. They also highlight the important role of knowledge in the production system and in doing so make an important contribution to a key debate which has emerged in the social sciences in recent years.

User-based Innovation in Services Jan 25 2023 This book demonstrates pioneering work on user-based service innovation using

an analytical framework. This approach involves understanding the needs of users, the service firms collaborating with them, and recognising the fact that users are innovators and, as such, services develop whilst in use. As well as presenting case studies, the book discusses theoretically what user-based innovation means in the context of services. Three main fields are analysed: user-based innovation in knowledge-intensive business service, user-based innovation in public services, and models and methods for structuring user-based innovation. Incorporating both an academic and analytical approach, this insightful book will be a source of inspiration for researchers in innovation and services. Graduate and postgraduate students in business administration and innovation, as well as administrators in public administrations and executive managers in service firms will also find plenty of important information in this invaluable resource.
