The process of deindustrialization is often seen as part of the inevitable shift towards a knowledge based economy and urban economies come to rely on research and development, financial services, tourism and the creative industries. This book looks at the changing link between manufacturing and knowledge-based activities in urban regions. The authors develop a new framework drawing on insights from organization studies and regional economic literature looking at various international case studies in Western and Eastern Europe, South America and Asia.

Motor-Klassiker Jul 27 2020 Automobile sind mehr als reine Gebrauchsgegenstände für die Fortbewegung von einem Ort zum anderen. Zahlreiche Fahrzeuge erlangten Kultstatus, sind das Ziel automobiler Sehnsüchte oder schrieben Technikgeschichte. Dabei wird oft vergessen, dass ein Auto nicht nur wohlgeformtes Blech auf vier Rädern ist, sondern dass in ihm auch ein feuriges Herz in Form eines Motors schlägt. Und kaum eine andere Erfindung hat das 20. Jahrhundert derart beeinflusst wie der Verbrennungsmotor. Dieses Buch ist eine Hommage an den Verbrennungsmotor und das Automobil. Es stellt mehr als 80 Motorenklassiker und die dazugehörigen Fahrzeuge vor. Dabei geht es aber nicht nur um Fahrzeuglegenden, die große Erfolge im Rennsport feierten, sondern auch um Autos und Motoren, die besondere Geschichten erzählen.

Philosophy and Engineering Jan 21 2020 This volume, the result of an ongoing bridge building effort among engineers and humanists, addresses a variety of philosophical, ethical, and policy issues emanating from engineering and technology. Interwoven through its chapters are two themes, often held in tension with one another: "Exploring Boundaries" and "Expanding Connections." "Expanding Connections" highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with

policy makers, lay designers, and other members of the public. It also speaks to reflections included in this volume on the connections between fact and value, reason and emotion, engineering practice and the social good, and, of course, between engineering and philosophy. "Exploring Boundaries" highlights contributions that focus on some type of demarcation. Public policy sets a boundary between what is regulated from what is not, academic disciplines delimit themselves by their subjects and methods of inquiry, and professions approach problems with unique goals and by using concepts and language in particular ways that create potential obstacles to collaboration with other fields. These and other forms of boundary setting are also addressed in this volume. Contributors explore these two themes in a variety of specific contexts, including engineering epistemology, engineers' social responsibilities, engineering and public policy-making, engineering innovation, and the affective dimensions of engineering work. The book also includes analyses of social and ethical issues with emerging technologies such as 3-D printing and its use in medical applications, as well as social robots. Initial versions of the invited papers included in this book were first presented at the 2014 meeting of the Forum on Philosophy, Engineering, and Technology (fPET), held at Virginia Tech in Blacksburg, Virginia, USA. The volume furthers fPET's intent of extending and developing the philosophy of engineering as an academic field, and encouraging conversation, promoting a sense of shared enterprise, and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry.

1312: Among the Ultras Feb 20 2020 You can see them, but you don't know them. Ultras are football fans like no others. A hugely visible and controversial part of the global game, their credo and aesthetic replicated in almost every league everywhere on earth, a global movement of extreme fandom and politics is also one of the largest youth movements in the world. Yet they remain unknown: an anti-establishment force that is transforming both football and politics. In this book, James Montague goes underground to uncover the true face of this dissident force for the first time. 1312: Among the Ultras tells the story of how the movement began and how it grew to become the

global phenomenon that now dominates the stadiums from the Balkans and Buenos Aires. With unprecedented insider access, the book investigates how ultras have grown into a fiercely political movement, embracing extremes on both the left and right; fighting against the commercialisation of football and society – and against the attempts to control them by the authorities, who both covet and fear their power. Caught in time Jun 06 2021 In 1983 a car was burned in a village in Northern Germany. One person died and the culprit who was employed in a major German dairy was seriously injured. Could this have been a personal dispute or were there perhaps traces that needed to be covered up? Its pre-history started a good forty years previously. A division of German soldiers received an unusual assignment: to empty the Winter Palace in Leningrad of works of art and to send them to Germany. Hitler had plans to set up an impressive collection of art, which the Nazis had stolen at various locations around Europe. In the first instance, the works of art were hidden in an underground bunker in a field near Munich. In Berlin a museum inspector lost his job when his museum for modern art was closed, and he got by doing menial jobs. One day he is given a special assignment: to catalogue the stolen works of art for the new museum. He had no alternative but to say yes in order to put bread on the table. However, he plans a sophisticated revenge. But one day all things went wrong... Seventy years later valuable jewels from the court of the Russian Tsar turn up with the director for a large German company. Possibly this has something to do with a Dane who was involved in fakes until he disappeared without trace. The Danish police have been put on the case, but their German colleagues go to great lengths in order to avoid scanda. With its many fine details, this book gives a remarkable insight into life during the Second World War, from soldiers who freeze in the Russian winter to ordinary people in Germany who try to live life in their own way. The reader is given a great deal of perspective as well as the opportunity to postulate.

Automotive FDI in Emerging Europe Apr 23 2020 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Het terreurproces van Parijs Jun 25 2020 Op 13 november 2015 breekt in Parijs de hel los. Terroristische aanslagen op het voetbalstadion Stade de France, op cafés en restaurants en in theater Bataclan eisen 132 doden en meer dan 350 gewonden. Zes jaar later gaat het proces van start. Nog niet de helft van de ruim dertig betrokkenen zit in de beklagdenbank. Het zijn de twijfelaars, zij die hun bomgordel niet tot ontploffing durfden te brengen. De belangrijkste hoofdrolspelers van de tragedie zijn dood en kunnen niet meer worden bestraft. Wat is de bewezen, gerechtelijke waarheid achter de schokkende feiten? Paul Ponsaers volgde nauwgezet het 'proces van de eeuw'. Niet minder dan negen onderzoeksrechters werkten vier jaar aan de samenstelling van een strafdossier van ruim één miljoen bladzijden. De definitieve tenlastelegging van het Openbaar Ministerie telt 560 bladzijden. 1765 slachtoffers legden verklaringen ter zitting af. 330 advocaten en meer dan 2400 burgerlijke partijen waren betrokken. De auteur verwerkte de dagelijkse debatten, de elementen van het onderzoek en zijn expertise tot een indrukwekkend naslagwerk. Enkele maanden na Parijs was Brussel aan de beurt met een reeks bloedige terreuraanslagen op 22 maart 2016. Dit boek is daarom meteen een opstap naar het Brusselse proces. De analyse van de internationale geopolitieke context en de gedetailleerde reconstructie van de feiten, de daders en de procesgang zijn van onschatbare waarde voor wie professioneel met radicalisering te maken krijgt.

Numerous case studies from around the world help the reader to see clearly the relevance of design, safety, and professionalism to engineers. Engineering increasingly takes place in global contexts, with industrial and research teams operating across national and cultural borders. This adds a layer of complexity to already challenging ethical issues. This book is essential reading for anyone wanting to understand or communicate the ethics of engineering, including students, academics, and researchers, and is indispensable for those involved in international and cross-cultural environments. Integration von ökologischen Lebenswegbewertungen in Fahrzeugentwicklungsprozesse Aug 28 2020 Florian Broch entwickelte ein Konzept, bei dem die lebenswegorientierte ökologische Produktbewertung in den Entwicklungsprozess eines Fahrzeugs integriert wird. Über alle Phasen der Entwicklung hinweg wird so eine effiziente und richtungssichere Bewertung und Verfolgung der Ökobilanz eines Fahrzeugs ermöglicht. Weiterhin bereitet der Autor die Ergebnisse der Ökobilanz zielgruppengerecht für eine Entscheidungsunterstützung in der Fahrzeugentwicklung auf. Zur Begegnung von Datenlücken in frühen Phasen der Entwicklung führt er unter anderem eine Prognose von Parameterwerten der Sachbilanz mit Methoden des Data Mining durch.
