Long Road from Quito Feb 20 2020 Long Road from Quito presents a fascinating portrait of David Gaus, an unlikely trailblazer with deep ties to the University of Notre Dame and an even more compelling postgraduate life. Gaus is co-founder, with his mentor Rev. Theodore M. Hesburgh, C.S.C., of Andean Health and Development (AHD), an organization dedicated to supporting health initiatives in South America. Tony Hiss traces the trajectory of Gaus's life from an accounting undergraduate to a medical doctor committed to bringing modern medicine to poor, rural communities in Ecuador. When he began his medical practice in 1996, the best strategy in these areas consisted of providing preventive measures combined with rudimentary clinical services. Gaus, however, realized he had to take on a much more sweeping approach to best serve sick people in the countryside, who would have to take a five-hour truck ride to Quito and the nearest hospital. He decided to bring the hospital to the patients. He has now done so twice, building two top-of-the-line hospitals in Pedro Vicente Maldonado and Santo Domingo, Ecuador. The hospitals, staffed only by Ecuadorians, train local doctors through a Family Medicine residency program, and are financially self-sustaining. His work with AHD is recognized as a model for the rest of Latin America, and AHD has grown into a major player in global health, frequently partnering with the World Health Organization and other international agencies. With a charming, conversational style that is a pleasure to read, Hiss shows how Gaus's vision and determination led to these accomplishments, in a story with equal parts interest for Notre Dame readers, health practitioners, medical anthropologists, Latin American students and scholars, and the general public.

Tropical Classical Jul 27 2020 In *Tropical Classical* the author of *Video Nights in Katmandu* and *The Lady and the Monk* visits a holy city in Ethiopia, where hooded worshippers practice a Christianity that has remained unchanged since the Middle Ages. He follows the bewilderingly complex route of Bombay's dabbawallahs, who each day ferry 100,000 different lunches to 100,000 different workers. Iyer chats with the Dalai Lama and assesses the books of Salman Rushdie and Cormac McCarthy. And he brings his perceptive eye and unflappable wit to bear on the postmodern vogues for literary puffery, sexual gamesmanship, and frequent-flier miles. Glittering with aphorisms, overflowing with insight, and often hilarious, *Tropical Classical* represents some of Iyer's finest work.

This book tries to update significant epidemiological and clinical research in many aspects with a multinational perspective.

Each of the book's chapters includes a question-and-answer section based on real questions that Dr. Sanford's patients have asked him. General travelers, including students going abroad to study or backpack through the developing world and travelers who want to get off the beaten path as well as explore the cities of the world, will find this an invaluable resource.

Tropical Whites Jul 07 2021 As late as 1900, most whites regarded the tropics as "the white man's grave," a realm of steamy fertility, moral dissolution, and disease. So how did the tropical beach resort—white sand, blue waters, and towering palms—become the iconic vacation landscape? Tropical Whites explores the dramatic shift in attitudes toward and popularization of the tropical tourist "Southland" in the Americas: Florida, Southern California, Mexico, and the Caribbean. Drawing on a wide range of sources, Catherine Cocks examines the history and development of tropical tourism from the late nineteenth century through the early 1940s, when the tropics constituted ideal winter resorts for vacationers from the temperate zones. Combining history, geography, and anthropology, this provocative book explains not only the transformation of widely held ideas about the relationship between the environment and human bodies but also how this shift in thinking underscored emerging concepts of modern identity and popular attitudes toward race, sexuality, nature, and their interconnections. Cocks argues that tourism, far from simply perverting pristine local cultures and selling superficial misunderstandings of them, served as one of the central means of popularizing the anthropological understanding of culture, new at the time. Together with the rise of germ theory, the emergence of the tropical horticulture industry, changes in passport laws, travel writing, and the circulation of promotional materials, national governments and the tourist industry changed public perception of the tropics from a region of decay and degradation, filled with dangerous health risks, to one where the modern traveler could encounter exotic cultures and a rejuvenating environment.

Covers newly emerging diseases such as Zika virus, severe fever with thrombocytopenia syndrome (SFTS), and knowlesi malaria. Features topics in migrant medicine of particular importance to clinicians in non-tropical countries, including louse-borne-relapsing fever, spinal brucellosis, and hyperreactive malarial splenomegaly. Includes "classic" tropical diseases such as African trypanosomiasis, chagas, leprosy, and yaws. Reflects the use of novel diagnostics used in resource-poor settings, as well as developing drug resistance in relevant cases.
