Radio Tracking and Animal Populations Jul 06 2021 Radio Tracking and Animal Populations is a succinct synthesis of emerging technologies and their applications to the empirical and theoretical problems of population assessment. The book is divided into sections designed to encompass the various aspects of animal ecology that may be evaluated using radiotelemetry technology - experimental design, equipment and technology, animal movement, resource selection, and demographics. Wildlife biologists at the leading edge of new developments in the technology and its application have joined forces.

The R. J. Reynolds Tobacco Company Oct 21 2022 In this corporate history of the R. J. Reynolds Tobacco Company, Nannie M. Tilley recounts the story of Richard Joshua Reynolds and the vast R. J. Reynolds tobacco complex with precision and drama. Reynolds's rise in the tobacco industry began in 1891 when he introduced saccharin as an ingredient in chewing tobacco. Forced into James B. Duke's American Tobacco Company in 1899, the Reynolds company became the agency for consolidating the flat plug industry. In 1907, as the government began its antitrust suit against Duke, Reynolds himself bucked the trust and introduced another bestseller: Prince Albert smoking tobacco. The government won its suit in 1911; Duke's Tobacco Combination was dissolved, and Reynolds, left with a free and independent company, a much larger plant, and improved machinery, immediately began an expansion program. In 1913 Reynolds introduced Camels, a blend of Burley and flue-cured tobacco with some Turkish leaf. Perhaps the best-known cigarette ever produced, Camels swept the market and generally led the way until the development of filter-tipped cigarettes in the 1950s. Other important Reynolds advances include the systematic purchase and storage of leaf tobacco, the development of a stemming machine, the adoption of cellophane for wrapping cigarettes, and the production of cigarette paper. For its employees, the company established a medical department, introduced lunch rooms and day nurseries, and installed group life insurance. Perhaps more important than any of these items was the development of reconstituted leaf, a method of combining scrap tobacco and stems into a fine elastic leaf entirely suitable for use in any tobacco product. This achievement represented a savings of 25 percent in the cost of leaf and was followed by the development of the filter-tipped Winstons and Salems. The R. J. Reynolds Tobacco Company includes absorbing accounts of the company's steady technological progress, its labor problems and advances, and its influential role in North Carolina and in the industry through 1962.

G.W.M. Reynolds Reimagined May 16 2022 This essay collection proposes that G.W.M. Reynolds's contribution to Victorian print culture reveals the interrelations between authorship, genre, and radicalism in popular print culture of the nineteenth century. As a best-selling author of popular fiction marketed to the lower classes, and a passionate champion of radical politics and "the industrious classes," Reynolds and his work demonstrate the relevance of Victorian Studies to topics of pressing contemporary concern including populism, working-class fiction, the concept of 'originality', and the collective scholarly endeavour to 'widen' and 'undiscipline' Victorian Studies. Bringing together well-known and newly-emerging scholars from across different disciplinary perspectives, the volume explores the importance of Reynolds Studies to scholarship on the nineteenth-century. This book will appeal to students and scholars of the nineteenth-century press, popular culture, and of authorship, as well as to Victorian Studies scholars interested in the translation of Victorian texts into new and indigenous markets.

Parents with Mental and/or Substance Use Disorders and their Children Oct 29 2020 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

The Political Theory of Painting from Reynolds to Hazlitt Nov 22 2022 What is the function of painting in a commercial society? This text describes how British artists of the late-18th and early-19th centuries

attempted to answer this question.

Dickens, Reynolds, and Mayhew on Wellington Street Jan 24 2023 A glance over the back pages of mid-nineteenth-century newspapers and periodicals published in London reveals that Wellington Street stands out among imprint addresses. Between 1843 and 1853, Household Words, Reynolds's Weekly Newspaper, the Examiner, Punch, the Athenaeum, the Spectator, the Morning Post, and the serial edition of London Labour and the London Poor, to name a few, were all published from this short street off the Strand. Mary L. Shannon identifies, for the first time, the close proximity of the offices of Charles Dickens, G.W.M. Reynolds, and Henry Mayhew, examining the ramifications for the individual authors and for nineteenth-century publishing. What are the implications of Charles Dickens, his arch-competitor the radical publisher G.W.M. Reynolds, and Henry Mayhew being such close neighbours? Given that London was capital of more than Britain alone, what connections does Wellington Street reveal between London print networks and the print culture and networks of the wider empire? How might the editors' experiences make us rethink the ways in which they and others addressed their anonymous readers as 'friends', as if they were part of their immediate social network? As Shannon shows, readers in the London of the 1840s and '50s, despite advances in literacy, print technology, and communications, were not simply an 'imagined community' of individuals who read in silent privacy, but active members of an imagined network that punctured the anonymity of the teeming city and even the empire.

Apps Management and E-Commerce Transactions in Real-Time Jun 05 2021 Technology is continuously advancing and changing the way aspects of business are performed. The implementation of mobile business transactions to acquire various types of goods has changed the landscape of consumerism. Apps Management and E-Commerce Transactions in Real-Time is a timely research publication that features the latest scholarly trends, issues, and implications of the use of a new technological forum in electronic buying and selling. Including extensive coverage on a number of topics and perspectives such as social networks, customer satisfaction, and cloud computing, this book is ideally designed for researchers, academicians, and students seeking current research on mobile solutions in business deals.

High Reynolds Number Flows Using Liquid and Gaseous Helium Feb 01 2021 Liquid helium has been studied for its intrinsic interest through much of the 20th century. In the past decade, much has been learned about heat transfer in liquid helium because of the need to cool superconducting magnets and other devices. The topic of the Seventh Oregon Conference on Low Temperature Physics was an applied one, namely the use of liquid and gaseous helium to generate high Reynolds number flows. The low kinematic viscosity of liquid helium automatically makes high Reynolds numbers accessible and the question addressed in this conference was to explore various possibilities to see what practical devices might be built using liquid or gaseous helium. There are a number of possibilities: construction of a wind tunnel using critical helium gas, free surface testing, low speed flow facilities using helium I and helium II. At the time of the conference, most consideration had been given to the last possibility because it seemed both possible and useful to build a flow facility which could reach unprecedented Reynolds numbers. Such a device could be useful in pure research for studying turbulence, and in applied research for testing models much as is done in a water tunnel. In order to examine these possibilities in detail, we invited a wide range of experts to Eugene in October 1989 to present papers on their own specialties and to listen to presentations on the liquid helium proposals.

G.W.M. Reynolds Mar 26 2023 The influential journalist, editor, and prolific fiction writer G. W. M. Reynolds (1814-1879) finally receives the attention he is due in this collaborative volume. Essays address Reynolds's involvement with Chartism, serial publication, the mass market periodical, commodity culture, and Reynolds's long-running urban gothic work, *The Mysteries of London*. Comprehensive bibliographies of Reynolds's own writings and relevant secondary works make this volume an essential resource for scholars.

Sir Joshua Reynolds Dec 23 2022 Sir Joshua Reynolds explores the ways in which portrait-painting is embedded in the social fabric of a given culture as well as in the social and professional transaction between the artist and his or her subject. In addition to providing a new view of Reynolds, Wendorf's book develops a thoroughly new way of interpreting portraiture.

Use of Riblets to Obtain Drag Reduction on Airfoils at High Reynolds Number Flows Sep 27 2020 An investigation was carried out to study the drag reduction capabilities of riblets (commercially available) when installed on a supercritical airfoil which was aerodynamically tested in the NAE's High Reynolds Number 2 D Test Facility. The flow conditions in this test ranged from $M=0.15$ to $M=0.76$, and $Re/ft = 1.5$ million to $Re/ft = 8$ million. The airfoil with riblets exhibited less drag than a completely turbulent air foil (without riblets) for Mach Number M
