A House to Remember Nov 22 2022 What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

The Invisible College Feb 01 2021 What is the nature of unidentified aerial phenomena? Forty years ago a small cadre of dedicated researchers began actively investigating cases, interviewing witnesses, and exchanging data through a small, informal network of international contacts. Today this low-profile network, or "invisible college," has grown into a larger, multi-nation volunteer research effort joined by many individuals. But the questions first raised 40 years ago remain current-and unanswered. "I believe that a powerful force has influenced the human race in the past and is again influencing it now. Does this force represent alien intervention, or does it originate entirely within human consciousness? This is the question that forms the basis of the work of the Invisible College of UFO researchers." -- Jacques Vallee
"THE INVISIBLE COLLEGE is unlike any other UFO book ever

written. Dr. Vallee questions what everybody else takes for granted, doubts what everybody believes, drenches us with data that doesn't 'fit' any of the theories of either the True Believers or the die-hard non-believers and then offers a hypothesis on his own." -- Robert Anton Wilson "An important book-not only are UFOs and psychic events inextricably linked, as Dr. Vallee so nicely points out, but neither can be understood without an appreciation of the role of myth, tradition, and belief system. Must reading for the serious student of contemporary events." -- Edgar Mitchell "Certainly one of the most interesting, thought-provoking books so far written on UFOs." -- Colin Wilson Dr. Jacques Vallee began his professional life as an astronomer at the Paris Observatory in 1961. While on the staff of the French Space Committee, he witnessed the destruction of the tracking tapes of unknown objects orbiting the earth, initiating a lifelong interest in the UFO phenomenon. Vallee arrived in the U.S. in 1962 and worked in astronomy at the University of Texas at Austin before receiving a Ph.D. in computer science from Northwestern University in 1967. There he became a close associate of J. Allen Hynek, then scientific consultant for the U.S. Air Force on Project Blue Book-the result was *The Invisible College*. Dr. Vallee is presently a venture capitalist living in San Francisco. His website is www.jacquesvallee.com.

Conservation of Architectural Heritage Jan 12 2022 This book focuses on the management and conservation of architectural heritage with the aim of increasing awareness about the value of such conservation and of saving what is left of history, which in turn rewards societies by supporting the tourism industry, generating economic return, and preserving communities' identities. Since it has become an essential need to manage and conserve the architectural heritage in order to protect the identity and heritage of a city, there appeared a gap between the theory and its application. Therefore, a considerable amount of attention has been directed by experts in this field toward emphasizing the contribution of heritage conservation in order to inspire the development of imaginative, useful high-quality design.

Mining of Mineral Deposits Oct 21 2022 In the last decades coal production capacity has increased rapidly and its quality, power and the reliability of equipment has steadily improved. Moreover, stability of

production processes can be controlled better. In connection with that, unification of scientific schools focusing on "Mining of deposits" is an integral tr

The House Your Stars Built Oct 09 2021 Level up your stargazing skills and learn to interpret your own astrological birth chart with this fun, accessible guide to the twelve houses of the zodiac, perfect for

armchair astrologers everywhere! So you know your sun sign, rising sign, and moon sign...but what about the rest of your birth chart? It's no longer enough to just to know you're a Scorpio or read your horoscope. After all, delving deeper into our natal charts and the nuances of the astrological world can offer us a rich, exciting tapestry of our innate preferences, relationships, choices, and destiny. For those in the know, the zodiac calendar is divided into twelve houses, each ruled by a different sign (Aquarius, Scorpio, Gemini, etc.) and said to govern a particular set of traits. When we're born, where the planets were stationed relative to those houses inform our natural tendencies. Understanding each house can bring detailed insights about every aspect of your life: people's first impression of you, to your values, communication, pleasure, home and family, partnership, and beyond. In order to fully understand our place in the universe we need to understand the meaning of each planet, the house it's stationed in, and what that interaction means. Going house by house, practicing astrologer and artist Rachel Stuart-Haas teaches you how to create and interpret your unique birth chart, making this often dense and complicated layer of astrology accessible for newcomers and astrology enthusiasts alike. With her expert guidance, you will gain insight into questions like: -Where will I feel at home? -What career paths fulfill me? -What do I need in a partner? -What makes me feel abundant? Perfect for anyone who has ever been curious about their place in the world, *The House Your Stars Built* is a must-have and beautiful resource for astrology lovers.

Scholarly Knowledge Sep 20 2022 Any attempt to understand the roles that textbooks played for early modern teachers and pupils must begin with the sobering realization that the field includes many books that the German word *Lehrbuch* and its English counterpart do not call to mind. The early modern classroom was shaken by the same knowledge explosion that took place in individual scholars' libraries and museums, and transformed by the same printers, patrons and vast cultural movements that altered the larger world it served. In the fifteenth through seventeenth centuries, the urban grammar school, the German Protestant Gymnasium and the Jesuit College, all of which did so much to form the elites of early modern Europe, took shape; the curricula of old and new universities fused humanistic with scholastic methods in

radically novel ways. By doing so, they claimed a new status for both the overt and the tacit knowledge that made their work possible. This collected volume presents case studies by renowned experts, among them Ann Blair, Jill Kraye, Juergen Leonhardt, Barbara Mahlmann-Bauer and Nancy Siraisi.

The Planets Dec 31 2020 “Might be just the book to bring out your inner astronomer . . . over 250 pages of breathtaking images from the past 50 years of NASA’s space exploration.” —Parade Preface by Bill Nye This magnificent volume offers a rich visual tour of the planets in our solar system. More than two-hundred breathtaking photographs from the archives of NASA are paired with extended captions detailing the science behind some of our cosmic neighborhood’s most extraordinary phenomena. Images of newly discovered areas of Jupiter, fiery volcanoes on Venus, and many more reveal the astronomical marvels of space in engrossing detail. Anyone with an interest in science, astronomy, and the mysteries of the universe will delight in this awe-inspiring guide to the wonders of the solar system. “As you turn through the pages, you’re hit with true moments of awe, photos that remind you the power of nature extends beyond our own planet.” —Houston Chronicle “Breathtaking pictures show the otherworldly magic of the solar system . . . The images are at once humbling and uplifting: Here in the black void of space is Saturn’s frozen moon, Mimas, white and pitted like a galactic golf ball; here is the tiny golden orb called Io, casting a shadow in a perfect inky circle on the marbled surface of Jupiter; here is the great sun, flames spurting from its surface like plumes.” —The Wall Street Journal “[A] gorgeous photographic tour of space . . . The collection is a remarkable reminder of how much has been learned about the planets over the past few decades, solving many mysteries yet introducing many more.” —Publishers Weekly

The Archaeology of Wak'as Apr 15 2022 In this edited volume, Andean wak'as—idols, statues, sacred places, images, and oratories—play a central role in understanding Andean social philosophies, cosmologies, materialities, temporalities, and constructions of personhood. Top Andean scholars from a variety of disciplines cross regional, theoretical, and material boundaries in their chapters, offering innovative methods and theoretical frameworks for interpreting the cultural particulars of

Andean ontologies and notions of the sacred. Wak'as were understood as agentive, nonhuman persons within many Andean communities and were fundamental to conceptions of place, alimentation, fertility, identity, and memory and the political construction of ecology and life cycles. The ethnohistoric record indicates that wak'as were thought to speak, hear, and communicate, both among themselves and with humans. In their capacity as nonhuman persons, they shared familial relations with members of the community, for instance, young women were wed to local wak'as made of stone and wak'as had sons and daughters who were identified as the mummified remains of the community's revered ancestors. Integrating linguistic, ethnohistoric, ethnographic, and archaeological data, *The Archaeology of Wak'as* advances our understanding of the nature and culture of wak'as and contributes to the larger theoretical discussions on the meaning and role of—"the sacred" in ancient contexts.

The Martians Sep 08 2021 "The Martians opens a door into a possibility that most would reject as impossible. But Nick Redfern in this provocative and exciting book makes a startling case for there being life on Mars—and, in fact, for the whole history of Mars being very, very different from what we have supposed. A wonderful adventure and a very exciting story!"—Whitley Strieber, #1 New York Times bestselling author, *Communion* *The Martians* is an in-depth study of the theory that Mars was once a world that teemed with life. Perhaps, even, life not too dissimilar to ours. Incredibly, the Martians may still be there. Alive. The questions that this book asks and answers include the following: What kind of society did the Martians have? What caused their world to become harsh and desertlike? Did global warming or nuclear war ensure the extinction of the Martians? Are Martian artifacts strewn about the surface, just waiting to be found by the likes of NASA? Has NASA already found such evidence, but chosen to withhold such monumental finds from the public and the media? Could some form of the Martians still exist, deeply below the surface of the planet, in secure installations that allow them to ensure their civilization continues? What do we know about the Martian environment, its atmosphere, and its landscape? *The Martians* explores the CIA's top-secret search for the Martians, multiple photos of strange anomalies, and the latest revelations

about the environment and water on Mars. And most tantalizing of all: Did an ailing Martian race come to Earth in past eons and were they confused with gods? The questions concerning life on Mars—then and now—are many. The answers are astounding.

Astrology: Secrets of the Moon May 04 2021 In *Astrology: Secrets of the Moon* Patsy Bennett focuses on the study of the moon's north node signs. We are all familiar with our sun signs, but when used in conjunction, the moon's north nodes can provide a detailed picture of what can truly make you happy, explaining clearly what will lead you to a more productive and satisfying life. Each north node description has a list of approaches, talents, interests, challenges and potential pitfalls as well as an affirmation to help you focus on your own special attributes. Based on your unique astrological makeup you will also discover your most successful career paths, your most rewarding activities and the most fulfilling approaches to life that you can take. Much like a sun sign book, this book lists each north node sign from Aries to Pisces as a handy dip-in, dip-out book. You'll learn about yourself and those close to you, including your children. Each of the 12 zodiac signs depicts psychological archetypes and within each zodiac sign there are 12 subsections that explain in detail the secret you. Each section has a list of Approaches, Talents, Interests, Challenges and Potential pitfalls, these subheadings list key words and career suggestions.

The Economics of Uniqueness Feb 13 2022 In a world where half of the population lives in cities and more than 90 percent of urban growth is occurring in the developing world, cities struggle to modernize without completely losing their unique character, which is embodied by their historic cores and cultural heritage assets. As countries develop, cultural heritage can provide a crucial element of continuity and stability: the past can become a foundation for the future. This book collects innovative research papers authored by leading scholars and practitioners in heritage economics, and presents the most current knowledge on how heritage assets can serve as drivers of local economic development. What this book tries to suggest is a workable approach to explicitly take into account the cultural dimensions of urban regeneration in agglomerations that have a history and possess a unique

character, going beyond an approach based solely on major cultural heritage assets or landmarks. The knowledge disseminated through this book will help stakeholders involved in preparation, implementation, and supervision of development investments to better assess the values of cultural heritage assets and incorporate them in urban development policies.

Engineer's Field Book (Classic Reprint) Jan 24 2023 Excerpt from Engineer's Field Book In the columns, under the head of degrees and opposite the minutes, are given the distances in feet from the intersection of tangents to the beginning of one degree curve. To ascertain the distance for any given degree of curve, divide the distance given in the tables for a One degree curve, by the degrees of the required curve, and you have the distance from the point of intersection to the beginning or end of curve. Secret Journey to Planet Serpo Jul 06 2021 Documents how 12 people, as part of a top-secret U.S. government program, traveled to the planet Serpo and lived there for 13 years • Based on the debriefing of the Serpo team and the diary of the expedition's commander • Explains how the aliens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems • Reveals how our government has an ongoing relationship with the Serpo aliens

On July 16, 1965, a massive alien spacecraft from the Zeta Reticuli star system landed at the Nevada test site north of Las Vegas. Following a plan set in motion by President Kennedy in 1962, the alien visitors known as the Ebens welcomed 12 astronaut-trained military personnel aboard their craft for the 10-month journey to their home planet, Serpo, 39 light-years away. In November 2005, former and current members of the Defense Intelligence Agency--directed by Kennedy to organize the Serpo exchange program--came forward to reveal the operation, including details from the 3,000-page debriefing of the 7 members of the Serpo team who returned after 13 years on the planet. Working with the DIA originators of the Serpo project and the diary kept by the expedition's commanding officer, Len Kasten chronicles the complete journey of these cosmic pioneers, including their remarkable stories of life on an alien planet, superluminal space travel, and advanced knowledge of alien technologies. He reveals how the Ebens presented the U.S. with "The Yellow Book"--a complete history of the universe recorded holographically, allowing the reader to view actual scenes from pre-history to the present. He explains how the Ebens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems--knowledge still classified. Exposing the truth of human-alien interaction and interplanetary travel, Kasten reveals not only that the Ebens have returned to Earth eight times but also that our government continues to have an ongoing relationship with them--a relationship with the potential to advance the human race into the future.

Andean Ontologies Jun 05 2021 This volume explores the Pre-Columbian Andean concepts of time, space, and the human body through objects, skeletal remains, and language. This interdisciplinary approach to conceptualizing what the Andean concepts of being may

have been brings contemporary approaches to past notions of the sacred, with each discipline adding its own unique perspective to the Andean ontology. A particular strength of this volume is that most of the contributors are South American researchers, offering North American scholars entry into scholarship that has been confined to Spanish language publications.

New Techniques and Technologies in Mining Mar 14 2022 Mining is the foremost source of minerals that all countries find essential for maintaining and improving their standards of living. Mined materials are needed to construct roads and hospitals, to build automobiles and houses, to make computers and satellites, to generate electricity, and to provide many other goods and services that consumers enjoy. The high tech industries and even the better known resource industries are all dependent, in some way, on the mining industry. But exploring, extraction and processing of minerals require big material and labour costs and there is a big number of acute problems to face, such as: environment and water pollution, worsening of mining-geological conditions, depletion of minerals that can be extracted only by conventional methods, rock pressure manifestation, big depths of the deposits and transportation of the minerals on the surface. In order to find modern solutions there is a big number of scientists and engineers all over the world dedicating their research to most current problems and inventions of innovative technologies and techniques in mining. Some of the most important results of such research is presented in this book and covers the following topics: management of strain and stress state of the massif, underground coal gasification, substantiation of rational parameters of various types of support, ventilation in underground openings, design of mine workings and other vital questions.

Invaders as Ancestors Dec 23 2022 Since pre-Incan times, native Andean people had worshipped their ancestors, and the custom continued even after the arrival of the Spaniards in the sixteenth century. Ancestor-worship however, did not exclude members of other cultures: in fact, the Andeans welcomed outsiders as ancestors. *Invaders as Ancestors* examines how this unique cultural practice first facilitated Spanish colonization and eventually undid the colonial project when the Spanish attacked ancestor worship as idolatry and Andeans adopted

Spanish political and religious forms to challenge indigenous rulers. In this work, Peter Gose demonstrates the ways in which Andeans converted conquest confrontations into relations of kinship and obligation and then worshipped Christianized and racially "white" spirits after the Spaniards invaded, though the conquering Spaniards prevented actual kinship bonds with the Andeans by adhering to strict rules of racial separation. *Invaders as Ancestors* explores an alternative response to colonization beyond the predictable resistance narrative, presenting instead a creative form of transculturation under the agency of the Andeans. *Invaders as Ancestors* is a fascinating account of one of the most unusual transcultural encounters in the history of colonialism.
