The Casualty List Dec 20 2019 The novel is written in the first person, fiction based on the author's experience as a shipping fraud and casualty investigator for the insurance world. It takes the reader behind the scenes to tell the real story. You enter a world of natural and man-made catastrophes. Experience what it's like to be trapped on a burning tanker loaded with 400,000 tons of highly inflammable crude oil. What happens when a ship runs aground in thick fog. Imagine when lights failed, the ship in danger of breaking up. Experience being aboard a ferry carrying sheep across the Bass Straits when it capsizes. Swept up into the bows by an avalanche of water flooding in through the stern door with the ship going full astern. Trapped in a steel coffin in darkness surrounded by dying sheep. In danger of suffocating as the bubble of air is slowly depleted of oxygen as the sheep gasp for breath. Abandoning hope of survival, then elated as divers appear to your rescue. Then there's maritime crime. All that's needed is a rusty-hull destined for the breaker's yard. Insure a non existent cargo for an outrageous sum, and

then scuttle it at sea. The claim for millions of dollars for the loss of the cargo will be viewed with suspicion by insurers. Jim Stewart, the character in the book, meets many unique characters, in often tragi-comic situations. This is the first of three novels by J.R.Euen..

Geology of Southwest Gondwana Apr 16 2022 This book focuses on the geological evolution of Southwest (SW) Gondwana and presents state-of-the-art insights into its evolution. It addresses the diachronic assembly of continental fragments derived from the break-up of the Rodinia supercontinent later amalgamated to build SW Gondwana during the Neoproterozoic–Cambrian transition, which on a global scale includes parts of

present-day South America, Africa and Madagascar. The book presents 24 state-of-the-art reviews including the most crucial controversies. Most experienced scientists about the geology of SW Gondwana from Europe, Africa, South America and Australia present contributions on key areas addressing the interactions between the main cratons and fold belts on both sides of the South Atlantic Ocean. Chapters related to the geology of the major Archean-Paleoproterozoic cratons and Neoproterozoic Brasiliano/Pan-African fold belts enable readers to gain an in-depth understanding of the tectonometamorphic and magmatic evolution of SW Gondwana. The book covers a wide range of issues including metallogenetic, sedimentary, paleobiological and paleoclimatic processes and allows a deep insight into this key period of the Earth's evolution.

Continent Formation Through Time Jul 07 2021 The continental crust is our archive of Earth history, and the store of many natural resources; however, many key

questions about its formation and evolution remain debated and unresolved: What processes are involved in the formation, differentiation and evolution of continental crust, and how have these changed throughout Earth history? How are plate tectonics, the supercontinent cycle and mantle cooling linked with crustal evolution? What are the rates of generation and destruction of the continental crust through time? How representative is the preserved geological record? A range of approaches are used to address these questions, including field-based studies, petrology and geochemistry, geophysical methods, palaeomagnetism, whole-rock and accessory-phase isotope chemistry and geochronology. Case studies range from the Eoarchaean to Phanerozoic, and cover many different cratons and orogenic belts from across the continents.

The Amazon Apr 04 2021 In the eight pieces that make up *Land Without History*, first published in Portuguese in 1909, Euclides da Cunha offers a rare look into twentieth century Amazonia, and the consolidation of South American nation states. Mixing scientific jargon and poetic language, the essays in *Land Without History* provide breathtaking descriptions of the Amazonian rivers and the ever-changing nature that surrounds them. Brilliantly translated by Ronald Sousa, *Land Without History* offers a view of the ever changing ecology of the Amazon, and a compelling testimony to the Brazilian colonial enterprise, and its imperialist tendencies with regard to neighboring nation-states.

Tree of Codes Mar 23 2020 A masterful work of storytelling, a unique sculptural object created through a collaborative process between Visual Editions and author. A curiosity with the die-cut technique was combined with the pages' physical relationship to one another and how this could somehow be developed to work with a meaningful narrative. This led to Jonathan deciding to use an existing piece of text and cut a new story out of it - his favourite book, *The Street of Crocodiles* by Bruno Schulz. Writing, cutting and proto-typing has created a new story cut from the words of an old favourite.

Dialogues of Love Jan 01 2021 First published in Rome in 1535, Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguel de Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'On the Origin

of Love' - that take place over a period of three subsequent days. They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover and teacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

Mesmo após a publicação de

O Hobbit e, posteriormente, O Senhor dos Anéis, J.R.R. Tolkien jamais deixou de escrever sobre seu mundo imaginário. Para ele, a Terra-média era parte de um mundo inteiro a ser explorado, e os escritos compilados em *A natureza da Terra-média* revelam alguns de seus esforços para compreender e aprimorar sua criação única. Tratando de temas mais abrangentes, complexos e profundos, como a metafísica da imortalidade, a reencarnação élfica e os poderes dos Valar, até assuntos mais específicos, como a fauna e a flora de Númenor, as especificidades geográficas de Gondor e quais espécies tinham barba, este livro é um verdadeiro tesouro que oferece aos leitores a chance de observar de perto a imaginação de um dos mais brilhantes escritores de fantasia da História."

Liquid Modernity Aug 28 2020 In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and

traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.
