Written by Peter Moon and Radu Cinamar, a highly placed Romanian intelligence operative, this book

heralds the most remarkable archaeological find in the annals of Mankind. Unbeknownst to most, there is an ancient sphinx located in the Bucegi Mountains of Romania. In 2003, the Pentagon discovered, through the use of satellite technology, an anomaly beneath this ancient sphinx. Through the highest levels of Freemasonry, the Pentagon was able to secure an alliance with the most secret department of the Romanian Intelligence Service which is known as Department Zero. Together, the Romanians and the Americans utilised the Pentagon's secret technology to penetrate a hidden chamber beneath the sphinx which was otherwise inaccessible to humans. What was discovered eventually was a holographic Hall of Records left by an advanced civilisation near three mysterious tunnels leading into the Inner Earth. The book chronicles the discovery of these modern day artefacts which represent the dawn of a new era for Mankind. Peter Moon is brought into the fold through his friend, Dr David Anderson, the mysterious scientist who founded the Time Travel Research Center on Long Island and also maintains a similar facility in Romania. Recognising that such satellite technology would have had to have utilised Dr Anderson's proprietary space-time technology for maintaining satellites in orbit, Peter Moon pursues these matters further and accepts Dr Anderson's invitation to Romania where he visits the Romanian Sphinx and learns of a mysterious association between the mysterious time travel scientist and Radu Cinamar. The Ecology of Building Materials explores key questions surrounding sustainability of building materials. It provides technical data to enable design and building professionals to choose the most appropriate materials for a project: those that are least polluting, most energy efficient, and from sustainable sources. The book also gives information and guidance on a wide range of issues such as recycling, detailing for increased durability and Life Cycle Analysis. Berge's book, translated from the Norwegian by Chris Butters and Filip Henley, offers safe and environmentally friendly material options. It provides an essential and easy-to-use reference guide to this complex subject for the building industry professional. New to this edition:**

- Thorough exploration of building materials in relation to climate change issues**
- Extensive updating of basic data, as**

well as the introduction of a wide range of new materials • Methods for recycling and reuse of materials • More information on the interaction between materials and the indoor environment, ventilation and energy use • Full colour text and user-friendly larger format

**Bjørn Berge** is a practicing architect, researcher and lecturer. Since the 1970s, he has written several books on building ecology for the Scandinavian public. He is one of the founders of **Gaia Architects** who have developed a wide range of pioneering techniques in sustainable building. As an innovative thinker about building and planning, **Christopher Alexander** has attracted a devoted following. His seminal books--*The Timeless Way of Building*, *A Pattern Language*, and *The Oregon Experiment*--defined a radical and fundamentally new process of environmental design. Alexander now gives us the latest book in his series--a book that puts his theories to the test and shows what sort of production system can create the kind of environment he has envisioned. *The Production of Houses* centers around a group of buildings which Alexander and his associates built in 1976 in northern Mexico. Each house is different and the book explains how each family helped to lay out and construct its own home according to the family's own needs and in the framework of the pattern language. Numerous diagrams and tables as well as a variety of anecdotes make the day-today process clear. The Mexican project, however, is only the starting point for a comprehensive theory of housing production. *The Production of Houses* describes seven principles which apply to any system of production in any part of the world for housing of any cost in any climate or culture or at any density. In

**the last part of the book, "The Shift of Paradigm," Alexander describes, in detail, the devastating nature of the revolution in world view which is contained in his proposal for housing construction, and its overall implications for deep-seated cultural change. 'No part of the Great War compares in interest with its opening', wrote Churchill. 'The measured, silent drawing together of gigantic forces, the uncertainty of their movements and positions, the number of unknown and unknowable facts made the first collision a drama never surpassed...in fact the War was decided in the first twenty days of fighting, and all that happened afterwards consisted in battles which, however formidable and devastating, were but desperate and vain appeals against the decision of fate.'** On of Britain's foremost military historians and defence experts tackles the origins - and the opening first few weeks of fighting - of what would become known as 'the war to end all wars'. Intensely researched and convincingly argued, Allan Mallinson explores and explains the grand strategic shift that occurred in the century before the war, the British Army's regeneration after its drubbings in its fight against the Boer in South Africa, its almost calamitous experience of the first twenty days' fighting in Flanders to the point at which the British Expeditionary Force - the 'Old Contemptibles' - took up the spade in the middle of September 1914: for it was then that the war changed from one of rapid and brutal movement into the more familiar vision of trench warfare on Western Front. In this vivid, compelling new history, Mallinson brings his experience as a professional soldier to bear on the circumstances, events, actions and individuals and speculates - tantalizingly - on what

might have been... **The Untold Story of Jesus and His Twin Brother, Judas Khrestus... Mystery and intrigue surround the church web of deceit, corruption, murder and debauchery. In THE BIBLE FRAUD, you will find the truth about Rabbi Jesus and his twin brother, their birth, marriages and deaths, as well as the bloodlines that have resulted from events of that time. This exceptional translation of Pirke Avot (Pirkei Avot) features in full the chapters and sacred phrases by the Jewish forefathers. Pirke Avot or Pirkei Avot - in English 'Chapters of the Fathers' - is a collection of sayings and aphorisms dating from antiquity which teach the ethics and morality of the Jewish faith. Attributed to various sages of Judaism who taught between the 2nd century BCE to the 2nd century AD, this collection combines some of the finest and most salient phrases coined by the revered rabbis of old. Since the early Middle Ages, it has been customary in several Jewish traditions for adherents and aspiring rabbis to devote time studying and absorbing these ancient sayings. Many are characterised by a memorable brevity, for expressing in a couple of sentences what other teachers would find difficult to teach in several pages. The Jewish principles of kindness, self-respect and the respect of others are expounded upon with insightful detail. This richly orchestrated novel, which won a national literary prize in the author's native land, Venezuela, also earned international recognition when the William Faulkner Foundation gave it an award as the most notable novel published in Ibero America between 1945 and 1962. Cumboto's disturbing story unfolds during the early decades of the twentieth century on a Venezuelan coconut plantation, in a turbulent Faulknerian double**

world of black and white. It records the lives of Don Federico, the effete survivor of a once vigorous family of landowners, and his Negro servant Natividad, who since the days of their mutual childhood has been his only friend. Young Federico, psychologically impotent and lost to human contact, lives on as a lonely recluse in the century-old main house of "Cumboto," surrounded by descendants of African slaves who still manage, despite his apathy, to keep the plantation on its feet. Natividad's heroic and selfless struggle to redeem his friend by awakening him to the stirrings of the earth and life about him sets in motion a series of events that are to shatter Federico's childlike world: a headlong love affair with a voluptuous black girl, her terrified flight in the face of the bitter condemnation of her own people, and the unexpected appearance, twenty years later, of their extraordinary son.

Throughout the novel runs a recurring theme: neither race can survive without the other. Black and white, Díaz Sánchezz suggests, embody contrasting aspects of human nature, which are not inimical but complementary: the languid intellectualism of European culture must be tempered with the indestructible vitality and intuition of the African soul if humanity is ever fully to comprehend the living essence of the world. Photographs of contemporary Veles are intertwined with fragments from an archaeological discovery also called 'the Book of Veles' -- a cryptic collection of 40 'ancient' wooden boards discovered in Russia in 1919, written in a proto-Slavic language. It was claimed to be a history of the Slavic people and the god Veles himself--the pre-Christian Slavic god of mischief, chaos and deception (Music Pro Guide Books & DVDs). The Linz Café is the fifth and latest book in a series which includes The Timeless Way of Building, A Pattern Language, The Oregon Experiment, and The Production of Houses[.] Here for the first time, Christopher Alexander describes a single building, commissioned by the organizers of the 1980 summer exposition "Forum Design" in Linz, Austria, with the explicit intention of allowing him to express his ideas, concepts, feelings, and philosophy, in a single building. "I thought at once that people would be tired after walking so much in the exhibit," Alexander writes, "and that what was needed most of all was a beautiful place to sit down, be comfortable, have a cup of coffee or a beer, enjoy the beauty of the Danube." The book describes the process of its design and the feelings which prompted it. Reflecting ideas**

presented in his earlier books and offering tantalizing glimpses of work now in progress, it deals with the ultimate spiritual reality of building. Among other things, there are first sketches of ideas, so far not published elsewhere, of Alexander's theory of color, his love of ornament, and illustrations of the hand-painted flowers with which he covered the inside of the café in the last days before its opening. --From dust jacket.

Very few King's earn the appellation 'Great'. Alfred is the only English King honoured with this name and is credited with various successes (the foundation of a navy, English education system and religious revival). His memory looms large in the English Imagination. The medieval 'Life' of King Alfred of Wessex purports to be written by Asser, a monk in the King's service. This account of one of England's best loved and most famous kings has been accepted as offering evidence on most aspects of life in early medieval England and beyond. It was used in Victorian times to create a 'Cult' of Alfred. Alfred Smyth offers a carefully annotated translation of the 'Life' together with a long commentary. He argues that the 'Life' is a forgery which has profound implications not only for our understanding of the early English and medieval past but also for the nature of biography and history. This close scholarly rendering of the text allows the reader access to the intricacies of medieval history.

Feeling his age, as his birthday rolls round once again, Inspector Montalbano decides to cheer himself up by dealing with a young driver's road rage in his own unique way. But his joy is short-lived, as at police headquarters he receives an angry phone call from a supermarket boss: there's been a robbery at his store and Montalbano's colleague is treating him as a suspect. On arrival at the scene, Montalbano quickly agrees with Inspector Augello that this was no ordinary break-in, but with the supermarket's infamous links to the Sicilian Mafia creating problems at every turn, this isn't going to be an easy case for the inspector to solve. And to add to the inspector's burden, the young driver he made an enemy of earlier on has returned to police headquarters to report a shocking crime . . . *A Voice in the Night* is followed by the twenty-first gripping mystery, *A Nest of Vipers*. **B.Sc. Practical Physics** The book analyses the transition from the ancient to the medieval period in polity, economy, the caste system and culture. It examines the form of peasant protest and the reasons for their failure and infrequency. The author also examines the development of tantrism and the mentality that feudalism created. A leading biblical scholar offers a powerful reexamination of the Bible's origins and its connections to human suffering Human trauma gave birth to the Bible, suggests eminent religious scholar David Carr. The Bible's ability to speak to suffering is a major reason why the sacred

**texts of Judaism and Christianity have retained their relevance for thousands of years. In his fascinating and provocative reinterpretation of the Bible's origins, the author tells the story of how the Jewish people and Christian community had to adapt to survive multiple catastrophes and how their holy scriptures both reflected and reinforced each religion's resilient nature. Carr's thought-provoking analysis demonstrates how many of the central tenets of biblical religion, including monotheism and the idea of suffering as God's retribution, are factors that provided Judaism and Christianity with the strength and flexibility to endure in the face of disaster. In addition, the author explains how the Jewish Bible was deeply shaped by the Jewish exile in Babylon, an event that it rarely describes, and how the Christian Bible was likewise shaped by the unspeakable shame of having a crucified savior. Christopher Alexander's always controversial work raises issues critical to regenerating the environment and creating a new culture for building--and rebuilding--our cities, neighborhoods, buildings, and gardens. Demonstrates the application of Alexander's theories and methods to a large-scale project and shows how architecture can bring life to a community. The creative processes described in the book are for anyone who designs, builds, shapes, repairs, or otherwise modifies the built environment. The 'Color Correction Handbook' covers a wide variety of techniques that can be used by colourists, no matter what system they're using.
