The chapters in the workbook correspond to those in the textbook and should be completed after reading the appropriate textbook chapter. Each chapter of the workbook reviews the material found in the textbook chapters to enhance your understanding of textbook content. The various types of questions include matching, true or false, multiple choice, fill-in-the-blank, and short answer. The lab workbook chapters also contain activities related to textbook content. The activities range from content reinforcement to real-world application, including design projects and broader modular activities. Reading Foundations of Engineering & Technology and using this lab workbook will help you acquire a base of knowledge related to the principles of technology and engineering systems, as well as the design and application of each. Completing the questions and activities for each chapter will help**

**you master the technical knowledge presented in the textbook. Integrating Educational Technology into Teaching shows pre-service teachers how to plan for Technology Integration, and offers them the opportunity to practice Technology Integration when designing curriculum to support and shape learning. Integrating Educational Technology into Teaching presents a comprehensive technology integration framework built on both research and proven classroom practices. The Technology Integration Planning Model (TIP Model) shows teachers how to create an environment in which technology can effectively enhance learning. This sixth edition shows how to incorporate the Technological Pedagogical Content Knowledge (Tech-PACK) framework into the TIP Model. Carefully-selected examples and exercises in each chapter encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to integrate technology into content area curricula. Using hundreds of lesson examples and recommended resources, the text balances the theory-based “why” and the practical “how” of using technology to support and shape the future of technology in education. The goal of this edition is for teachers to see more clearly their role in shaping the future of technology in education. This book illustrates that great education means employing technologies to fulfill**
